Connection Address Book",
select the contact to dial up
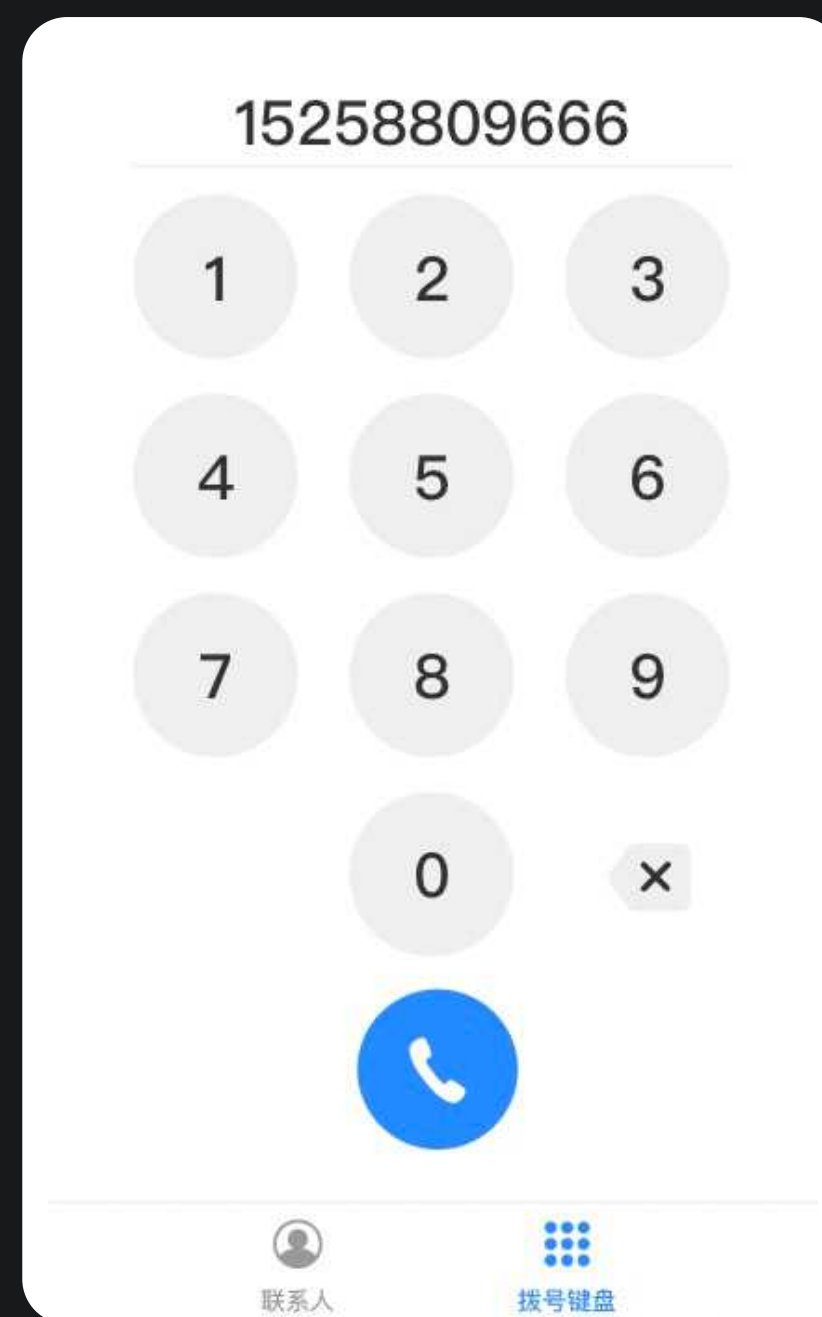

Manual dial

Tap the TAB on the bottom to
switch to manual dial up

Input the dial-up number and
dial up

Dialing up

The dial-up page displays the
Dialing-up message

The call will be automatically hung
up if it is not answered within 1
minute

Remote collaboration - tagging

Select a tagging tool

After remote collaboration is connected, on the page, tap to select the tagging tool on the lower left corner

Graffiti-Tagging within dotted line

After the tagging tool is selected, you can carry out graffiti-Tagging within the dotted line, and the screen will displays purple tag
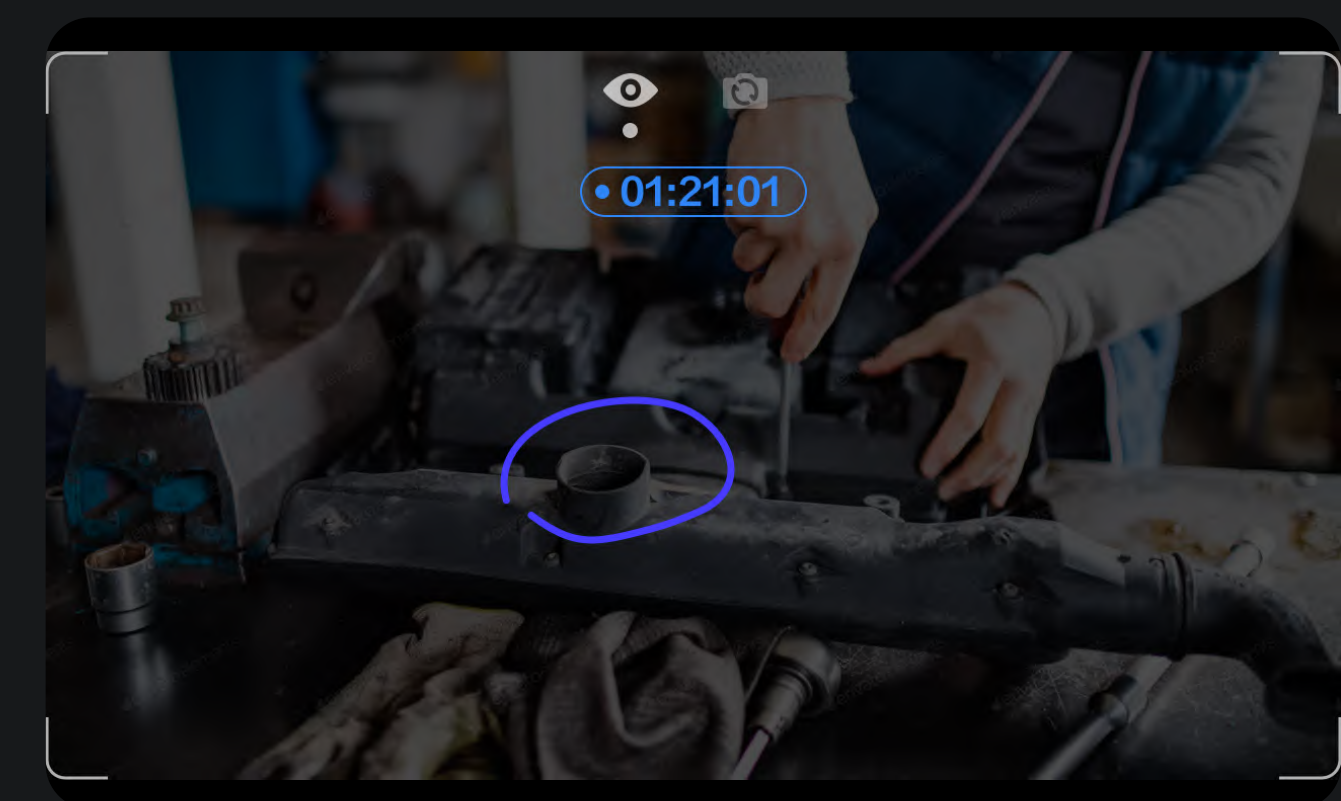

Tagging appears on the glass side in real time

After tagging is complete on your mobile, tagging information will be synchronized to the glasses in real time.

FAQ

How to power on/off?

- Check whether the battery has sufficient capacity (If the battery level is low, pressing and holding the power key will displays the Battery Low message)

- In off state, press and hold the power key for 5 s to display the boot screen

- In on state, press and hold the power key for 3 s to shut the device down, and then for 15 s to restart the device

No response when pressing and holding the power key?

- Check whether the battery has sufficient capacity (If the battery level is low, pressing and holding the power key will displays the Battery Low message)

- With low battery level or dead battery, please ensure that the power cord is properly connected to the device, and wait for 5 minutes and try again later.

- Properly connect the "type-C" interface of the power supply and check whether an indicator signals when the power supply is connected to the charge interface of the glasses.

- If the problem persists, please contact the service center.

How long will the device take to be fully charged?

- There is not a standard answer for this question. The charging efficiency and time are affected by the type of a power supply and battery level of the device.

- Theoretically, if an official charger is used, it may take about 1 hour to fully charge the glasses. It varies slightly according to the actual situation.

How long will the device take to be upgraded?

- The time (5-30 minutes) required for upgrade is different depending on the size of updates. Please wait patiently.

- Upgrade can be completed in background without affecting normal operation of the device. Updates come into effect after restart

- Please keep the device on and connected and ensure sufficient battery level during upgrade (operate as instructed by the system).

What's the effect from shutdown or restart during upgrade?

- The device operates normally during upgrade. If the device shuts down or restart during upgrade, this upgrade will fail.

- Failure of this upgrade will not lead to damage to the system or device. Simply try it again later (updates come into effect after restart)

Black screen during use

- Press the power key to check this is caused by mis-operation

- Check whether shutdown is resulted from low battery level

- If the problem persists, please contact the service center.

No response when initiating speech wakeup?

- Please check whether "Setup Wake up with "Rokid" option is enabled (disabled by default)

- Use the wakeup word, ensure proper pronunciation and try to avoid noisy environment

- If the device can be woken up but no instruction is executed, please check the instruction for correctness (for details, see the instruction list)

Service Support

- For any non-human damages to the device, please immediately contact the Rokid service center

- For any problem, please immediately contact your local vendor

Warranty Period

- We provide customers with one (1) year warranty for the complete set (excluding battery, consumables and artificial damages)

- For the products with quality defects, we will provide after-sales service of 15-day replacement from the date of purchase

- Please note that any of the following conditions is not covered by the warranty

Beyond the warranty perio

Damages due to failure to use, maintain or store the product in accordance with the instructions for use

Damages due to unauthorized disassembly

Invalid warranty certificate and invoice (except when evidences available can prove that the product is within the warranty period)

Alteration of the warranty certificate without authorization

Mismatching of product model or code indicated on the warranty certificate with the claimed product

Damages due to infection with virus during use

Damages due to any force majeure

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference.
(2)This device must accept any interference received, including interference that may cause undesired operation.
2.   Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note:This equipment has been tested and found to comply with the limits for a class B digital device,pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
    This equipment generates uses and can radiate radio frequence energy and,if not installed and used in accordance with the instructions,may cause harmful interference to radio communications.However,there is no guarantee that interference will not accor in a particular installation.if this equipmemt does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on,the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an autlet on a circuit different from that to which the receiver is connectec.
- Consult the dealer or an experienced radio/TV technician for help.
-

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment.

Kindly Reminder

If the problem persists, please forcibly restart the device (by pressing and holding the power key for 15 s), or ask a technician for help.
