MANUAL
SMART
FOUR

SMART FOUR

Smart Four is an AI-featured 3-dimensional strategy board game for Connect Four. The goal is to connect four in a row in any direction. With the infused AI, the board will record your moves and give flashing indications where the goal is reached. You can fire up a head to head competition, challenge against the robot or enjoy the mini game unique to the board. Connected with SmartFour APP! Explore more advanced functions: Adjusted AI and Online Battle! The Rule is simple, but the game is fun. You will enjoy the game like never before!

CONTENTS

QUICK START

Step 1:Awaken up the board

Press the middle button of the board for 3 seconds to awaken the board.

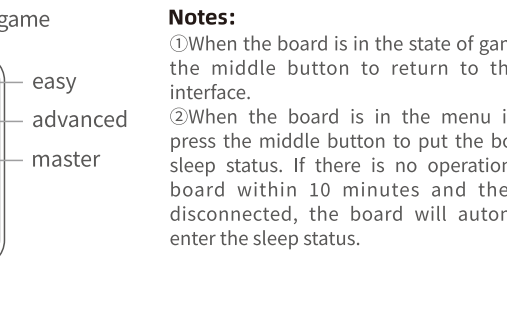

Notes:

- ① When the board is in the state of game, press the middle button to return to the menu interface.
- ② When the board is in the menu interface, press the middle button to put the board into sleep status. If there is no operation on the board within 10 minutes and the APP is disconnected, the board will automatically enter the sleep status.

Step 2: Select the gameplay in the menu interface

After the board awakened, it will automatically enter the menu interface. Press one lighting button to enter the corresponding game play.

Notes:

- ① When the board is in the state of game, press the middle button to return to the menu interface.
- ② When the board is in the menu interface, press the middle button to put the board into sleep status. If there is no operation on the board within 10 minutes and the APP is disconnected, the board will automatically enter the sleep status.

Game mode

1. Head to head mode (2 players)

Players choose their own checker color. One player places a checker on one button of the board and then presses the same button, the indicator light will flash once and turn into normally on status. The other player places his checker on the board and presses. Repeat the steps above, until one of them wins the game.

2. Robot mode(1 player)

Player chooses his own checker color and moves first. Player places a checker on one button of the board and then press the same button, the indicator light will flash once and turn into normally on status for 1 second. The robot will give a steady flashing light when it decided where to go, player follows the flashing light to place a checker for the robot then presses the button. Repeat the steps above, until player or robot wins the game. Note: In robot mode, revolving lamp will appear when the robot thinks for some while.

Rules

1. In robot mode, player always moves first.
2. Press the button each time you place a checker.
3. Checkers can only be up to 5 layers on one button, or there will be a flashing indicator light and an error prompt.
4. In robot mode, there will be an error prompt if not following the flashing light to place the checker.

INTRODUCTION TO LIGHTS-OUT GAME

How to win the game

Turn off the lights of all buttons on the board.

Rules

1. Click any button on the board, the button and four other buttons on its top, bottom, left, and right will all turn to the opposite status (ie: the one that was originally on will be turned off, and the one that was previously turned off will be turned on)
2. Each difficulty has unlimited levels, press the middle button for 3 seconds to return to the menu interface.

CONNECTING TO APP

1. Scan the QR code below, or search for "SmartFour" in iOS or Android app stores and download the SmartFour app.

App Compatibility

Apple iOS 9.0 and later.
Android 6.0 and later.
Devices must support Bluetooth 4.0 and later.

2. Open the app and click the Bluetooth icon on the homepage to automatically search and connect.

Notes:

- ① Make sure the Bluetooth of your device is turned on.
- ② Make sure the board is in the menu interace and fully charged and disconnected from previous devices before connecting.
- ③ Only connect the board within the SmartFour app. Do not pair it in your device' s Bluetooth list.
- ④ According to Android 6.0 requirements, apps must have location permission in order to use fast Bluetooth scanning connection function. If you use an Android device, please make sure the location service(GPS) is enabled and authorized before connecting, otherwise the app can not find yourboard.

CHARGING THE BOARD

Please fully charge the board before your first time use.

1. Use the provided charging cable to connect the board to a qualified USB power adapter.

FCC Statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into and outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
