

User Manual

FCC ID:2ATQWS1000

Model Name:S1000

Product features

Wireless experience, intimate price

Reliable 2.4ghz wireless connection

Curved shape can be comfortably controlled all day long

Optical sensors can be used on a variety of surfaces

Wireless connection distance up to 30 feet (10 meters)

1 year limited warranty

Product specification

size: 104*61*34mm

weight: 80G

Key operating force: 50-70G

Rate of return: 250Hz

Acceleration:10G

Sweep frequency: 6000fps

Movement speed: 60in/s

Power consumption of electric current: 6mA

Compatibility: Windows/7/8/10 iso10.0

Mouse is installed

1. Remove the wireless mouse and USB receiver from the packaging box.
2. Plug the USB receiver into the USB port of the computer
3. Push the cover at the bottom of the mouse and enter the battery into the mouse in the correct direction.

You can use the mouse now.

Frequently asked questions:

1. Is the power on?
2. Check the USB receiver and replace the USB socket.
3. Check the battery.
- 4, replace a mouse pad, remove the receiver and mouse obstacles.
5. Unplug the receiver, insert the USB port, reinstall the battery, press any key to reconnect, the whole operation needs to be completed within 15 seconds.

Receiver collection function

The mouse USES a USB receiver and can be placed on the USB port of a PC or NoteBook for a long time without any effect on the computer. If you want to carry the mouse out or collection alone, you can put the receiver in the mouse internal, convenient to save, easy to carry out to avoid omission.

Automatic sleep function

If you don't use the mouse for 15 minutes, it will go into an automatic sleep shutdown to save energy. As long as you press any key can be used again.

If you turn off the computer or unplug the receiver, simply press a button or move the mouse to go into hibernation.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
