

QUICK MANUAL

for
N830

[JN830]

Your watch is a Bluetooth® Link Watch that corrects the time automatically by receiving time information from a smartphone installed with the dedicated application.

- ※Keep the dedicated application running at all times.
- ※Keep your smartphone within 3 meters from the watch.
- ※In the places where use of radio waves is prohibited, such as in airplanes and hospitals, turn off the automatic reception function of the watch, and do not perform manual reception.
- ※Your watch is compliant with or certified by the radio law of various countries and regions. Use of it in areas other than those may be illegal and subject you to punishment. For details, refer to the Instruction Manual on our website. (<https://www.seikowatches.com/jp-ja/customerservice/instruction?language=English>)

 - Part dual time function
 - Time correction via Bluetooth communication
2. Accuracy
 - Loss/gain (monthly rate): Less than 15 seconds (when worn on arm at normal temperature range between 5°C and 35°C)
3. Battery
 - Lithium battery, 1 piece: SB-T15 (CR2012)
4. Battery life
 - 4 years

INSTALLATION OF APPLICATION

Time Connect

1. Check the type and version of the OS running on your smartphone. For the OSs supported by the watch, visit our website. (<https://www.seikowatches.com/jp-ja/customerservice/bluetooth>)
2. Download the application “Time Connect” for exclusive use with the watch.

For iOS:
Download from
“App Store.”

For Android:
Download from
“Google Play.”

3. Install the dedicated application “Time Connect” on your smartphone.

※If the application requests permission to use the position information, set the smartphone so that such permission is granted to the application.

REGISTRATION OF WATCH

Before using the watch with a smartphone for the first time, be sure to register it on the smartphone. Registration procedure is no longer required for Bluetooth communication thereafter.

Before Registering the Watch

1. Enable the Bluetooth function on the smartphone.
 - ※The method of enabling the Bluetooth function differs depending on the model of the smartphone. For details, please refer to the instruction manual for your smartphone.
2. Start up the dedicated application “Time Connect.”
While registering the watch, make sure that the application screen is kept displayed on the smartphone.

To Start Registration

1. Operate the watch following the procedure below to register the watch on the smartphone.

Press and hold the button at the 3 o'clock position for more than 2 seconds. The hour and minute hands align together to point to the 3 o'clock position.

2. Check that the registration of the watch is completed successfully. When the watch connects with the application of the smartphone, “Watch registered” is shown on the application screen, indicating that the watch is successfully registered on the smartphone.

Each time the watch is used with a new smartphone, be sure to follow the procedures in “INSTALLATION OF APPLICATION” and “REGISTRATION OF WATCH” above.

OPERATION

※The design of the watch differs from model to model, and the design illustrated above may not be the same as that of your watch.

Reception of Time/Calendar Data

Automatic Reception

With each continuous press of Button C for more than 2 seconds, the automatic reception function is turned on and off alternately. The hour and minute hands align together to indicate the setting status for 5 seconds.

※When the automatic reception function is turned on, the watch automatically receives the time data from the smartphone once every 24 hours.

Manual Reception

Press and hold Button B for more than 2 seconds. The hour and minute hands align together to point to the 3 o'clock position, and the data reception is started.

Reception Result Display

After the reception is performed, the hour and minute hands align together to indicate the result of the reception for 5 seconds.
※By pressing Button A for more than 2 seconds, the hands show the reception result.

When the reception was successful, the hands point to “Y.”
When the reception failed, the hands point to “N.”

Calendar Display

By pressing Button A, the hour and minute hands indicate the day of the week and the date for 10 seconds, respectively.

[Ex.: 25th, Thursday]

Read the day-of-week scale that the hour hand points to, and the date scale that the minute hand points to.

How to use the part dual time function

● The part dual time is set to Tokyo in the default settings. By pressing Button C, the time in Tokyo can be easily checked when you are traveling abroad.

By pressing Button C, the hour and minute hands point to “AM” (morning) or “PM” (afternoon). After this, the time set in the part dual time function is displayed for 10 seconds.

Morning/afternoon display: AM

How to set the part dual time

The part dual time cannot be set by receiving the time using the dedicated application. To set the part dual time to any time other than Tokyo, set it using the following method.

※ The part dual time can only be set in “hours.” “Minutes” is fixed to the regular time. Therefore, it cannot be set to any other value.

1. While the part dual time is displayed, press and hold Button A and Button C for more than 2 seconds. The hour hand and minute hand move to indicate the part dual time currently set. The hour hand points to the currently set time and the minute hand points to “AM” (morning) or “PM” (afternoon).
2. With each press of Button A or C, the hour hand advances an hour or moves back an hour, respectively. It moves quickly if the respective buttons are kept pressed.

3. Once you have finished setting the part dual time, press Button B. The minute hand shows the “minutes,” and then after 10 seconds, the display returns to show the time. If no operations are performed for around 3 minutes, the display similarly returns to show the time.
