ID Label Information and Location (FCC & IC) v3

The equipment “can only operate in conjunction with another associated product that has an electronic display” (it is controlled via an app on a smartphone and has neither any user controls nor even an on/off button on the device itself). Per FCC and IC guidance, e-labeling is valid for the product.

Please see below screen shot which shows where the app lists FCC ID, model number, and IC certification number. The settings page, where the information is listed, is reachable within 1 click of the app’s Home / main page.

Relief.

In addition, a temporary label (sticker) will be placed on the product packaging with the same information. The design of the sticker is shown below.

FCC ID: 2ATSC-R1001
Model number: R1-001
IC: 25199-R1001
