The image shows the internal components of a smartphone, laid out on a blue textured surface. A metal ruler is positioned vertically along the left edge, with markings from 0 to 28 cm. Another ruler is placed horizontally at the bottom, with markings from 1 to 30 cm. The main component is a black printed circuit board (PCB) populated with various electronic components. Key features include:

- A large rectangular silver-colored heat spreader or shield in the center.
- Two circular gold-plated contacts labeled "MAIN" and "AUX" near the top.
- A white label on the left side with the text "SAMSUNG ELECTRONICS CO., LTD." and a QR code.
- A small white label with the text "EM_I6223_366B_V2.0".
- Various smaller components like capacitors, resistors, and integrated circuits are visible across the board.
- Gold-plated connectors and pads are located along the edges, likely for the display, camera, and charging port.

The overall appearance suggests a professional repair or inspection setup.
