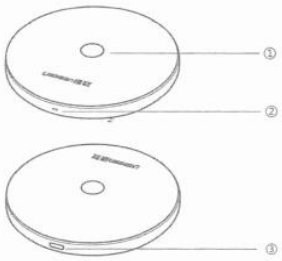
preface

Dear users, thank you for purchasing green link products. To further understand the product, please read this manual carefully before use. Wish you a pleasant experience!

Product diagram

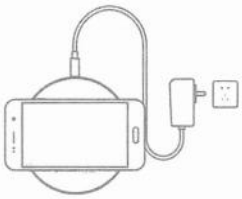


0 wireless charging area (2) indicator light (3 Micro USB)

Product specification

INPUT	DC 5V/2A ,9V/2A,12V1.5A
OUTPUT	15W MAX
Shell material	Aluminum alloy+acrylic
Product Protection	Over current,over pressure,over temperature,short current protection
Product size	Φ100*9.2（mm）

Connection diagram



1. Connected products:

A. Connect the product to the power supply

B. Put the wireless charging device into the wireless charging area of the product;

C. When the blue indicator light is always on, the product charges the wireless charging device;

2. Color status of indicator light:

A. When the product is connected to the power supply, the indicators of dark blue, green and sky

B. When the product enters the charging state, the dark blue indicator is always on;

C when the wireless charging device is placed away from the wireless charging induction area, or when the foreign matter is placed in the wireless

D. when the wireless charging device is fully charged, the green indicator light is always on;

Warm tip :4

· fast charging can only be realized when the product is connected to the power adapter

ard;

· wireless charging equipment is charged and discharged in the process of charging, and heat is the main phenomenon. It is recommended that the equipment be pulled out in time after full charge, so as to avoid long-term cycle charging, resulting in continuous heat of the product and charging equipment, and avoid loss of battery life of the equipment;

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this devicemust accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the partyresponsible for compliance could void the user's authority tooperate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to providereasonable protection against harmful interference in a residential installation. This equipment generates, uses and canradiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference toradio or television reception, which can be determined by turning the equipment off and on, the user is encouraged totry to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and any other radio device.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
