| <div>Solder<br/>Board-Component View<br/>4</div> |  <p>A photograph of a green printed circuit board (PCB) component, labeled E360179, placed on a blue textured surface. The board is oriented horizontally and features various electronic components, including a large silver electrolytic capacitor (220 35V RVT) on the left, several resistors, and integrated circuits. A ruler is positioned vertically to the left of the board, showing measurements from 0 to 80 mm. The board is marked with "Designed by IT Team" and "NO. DA1035".</p> |
| <div>Solder<br/>Board-Component View<br/>5</div> |  <p>A photograph of a small green PCB component, labeled DC1082-A, placed on a blue textured surface. The board is oriented horizontally and features a small integrated circuit, resistors, and a white connector with two wires. A ruler is positioned vertically to the left of the board, showing measurements from 0 to 80 mm. The board is marked with "DC1082-A" and "V1.5".</p>                                                                                                           |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <div>Solder<br/>Board-Component View<br/>6</div> |  <p>A photograph showing a small green printed circuit board (PCB) component with a black square component and two thin wires (one brown, one black) attached. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 80 mm marks.</p>                                                                            |
| <div>Antenna View</div>                          | <div>Antenna</div>  <p>A photograph showing a larger green PCB with various electronic components, including a blue integrated circuit (IC) and a silver circular component. A red box labeled "Antenna" points to a specific area on the board. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board positioned between the 10 mm and 80 mm marks.</p> |
