

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment, possibly a spectrum analyzer or a power supply, sits on a wooden bench. A red cable is connected to it. To the right, another wooden bench holds a long, thin, white rectangular object, likely a test fixture or a component. A power strip is visible on the wall between the two benches, with several cables plugged into it. The floor is a light-colored concrete.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. In the center, a yellow rectangular object, likely a test fixture or a component, is placed on a blue metal stand. The stand has a yellow and black striped safety barrier around it. The background is a wall covered with white, square-shaped absorbers, typical of an anechoic chamber. The floor is a light-colored concrete.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**
