

Global 4G WiFi Router TD20

User Guide

Product Appearance and Interface Description

Side button
Press and hold for 10 seconds to reset the device.
Short press to toggle screen content.

SIM card slot
In the off state, you can insert your nano SIM card(4FF) for use.

Insert the card pin into the small hole on SIM card holder to remove the card holder from device, put the SIM card in the holder, and then load the SIM card holder into the device.

This device supports vSIM technology, which can be used without inserting a physical SIM card. To use vSIM, you need to purchase a package from an SP (Service Provider).

Cable socket
Charge your device by connecting the charging plug via the Type-C USB cable.

Screen
Display network status, traffic usage, WiFi SSID and password, etc.

When not operating the device, the screen will go off automatically after 15 seconds, short press the power button to light up/off the screen.

Reset hole
Press and hold for more than 5 seconds to reset and restart the device.

Product Specification

Colour Black
Dimensions 62mm×62mm×13mm
Weight <60 g (Excluding cables, chargers, etc.)

Screen 1.4 inch

Supply Voltage DC5V (3 options: Type-A, Type-C, USB charger)

Power Consumption <1.5W

Working Temperature -10°C ~ +55°C

Working Humidity ≤ 90%

Supported Network Formats and Frequency Bands
FDD:B1/B2/B3/B4/B5/B7/B8/B9/B12/B13/B17/B18/B19/B20/B25/B26/B28AB/B66
TDD:B34/B38/B39/B40/B41
3G:B1/B2/B4/B5/B8

4G Speed Max DL 150Mbps/UL 50Mbps

WiFi WiFi6 (802.11b/g/n/ac/ax) 2.4G

WiFi Hotspot Sharing Max 16 concurrent connected users

Steps for Using the Device

1. WiFi device can't be powered on/off

- ① Please check, use the normal working charging cable and charging plug, and supply power for a period of time before trying to power on. Please check the charging port for any abnormalities.
- ② Please make sure that the side key is not loose or obviously damaged, if there is any abnormality, please return to the step of processing.

2. Step2: Purchase data package(optional)

- ① Open the mall and scan the QR code binding device again.

② After confirming the above is used and damaged, charging cable and charging plug, the device can't be charged, the device may be in water or hardware abnormalities, please return for testing and repairing.

3. Step3: Connect to WiFi hotspot

- ① Turn the device off and on again, when the 4G appears on the upper left corner of the screen, then reconnect the WiFi to use the network.

② If your phone supports scanning QR code to connect to WiFi, you can press the side button and the screen will display the "Set-WiFi" QR code, then use your phone's camera to scan the QR code to establish a WiFi connection.

4. WiFi network set but unable to connect to the network

Please check if the WiFi SSID, Password are set correctly.

5. Device's WiFi can't be detected

Notes:

- ① The charging ambient temperature is between 0°C -45°C. Charging in high temperature, humid or fire risk environments should be avoided.

② Store the unit in a dry, well-ventilated environment when it is not in use.

③ It is normal for the equipment to be hot when used, and the equipment can be placed in a cool and ventilated place to cool down accordingly.

6. Networks connected but can't access the internet

The charger should be unplugged when the power supply is finished or has not been used for a long period of time, so as to avoid safety hazards caused by prolonged continuous power supply.

Quick Troubleshooting

1. WiFi device can't be powered on/off

- ① Please check, use the normal working charging cable and charging plug, and supply power for a period of time before trying to power on. Please check the charging port for any abnormalities.
- ② Please make sure that the side key is not loose or obviously damaged, if there is any abnormality, please return to the step of processing.

2. Turn the device on

- ① Please check, use the normal working charging cable and charging plug, and supply power for a period of time before trying to power on. Please check the charging port for any abnormalities.
- ② Please make sure that the side key is not loose or obviously damaged, if there is any abnormality, please return to the step of processing.

3. Step2: Purchase data package(optional)

- ① Open the mall and scan the QR code binding device again.

② After confirming the above is used and damaged, charging cable and charging plug, the device can't be charged, the device may be in water or hardware abnormalities, please return for testing and repairing.

4. Step3: Connect to WiFi hotspot

- ① Turn the device off and on again, when the 4G appears on the upper left corner of the screen, then reconnect the WiFi to use the network.

② If your phone supports scanning QR code to connect to WiFi, you can press the side button and the screen will display the "Set-WiFi" QR code, then use your phone's camera to scan the QR code to establish a WiFi connection.

5. WiFi network set but unable to connect to the network

Please check if the WiFi SSID, Password are set correctly.

6. Device's WiFi can't be detected

Notes:

- ① The charging ambient temperature is between 0°C -45°C. Charging in high temperature, humid or fire risk environments should be avoided.

② Store the unit in a dry, well-ventilated environment when it is not in use.

③ It is normal for the equipment to be hot when used, and the equipment can be placed in a cool and ventilated place to cool down accordingly.

7. Networks connected but can't access the internet

The charger should be unplugged when the power supply is finished or has not been used for a long period of time, so as to avoid safety hazards caused by prolonged continuous power supply.

Safety Precautions

1. WiFi device can't be powered on/off

- ① Please check, use the normal working charging cable and charging plug, and supply power for a period of time before trying to power on. Please check the charging port for any abnormalities.
- ② Please make sure that the side key is not loose or obviously damaged, if there is any abnormality, please return to the step of processing.

2. Turn the device on

- ① Please check, use the normal working charging cable and charging plug, and supply power for a period of time before trying to power on. Please check the charging port for any abnormalities.
- ② Please make sure that the side key is not loose or obviously damaged, if there is any abnormality, please return to the step of processing.

3. Step2: Purchase data package(optional)

- ① Open the mall and scan the QR code binding device again.

② After confirming the above is used and damaged, charging cable and charging plug, the device can't be charged, the device may be in water or hardware abnormalities, please return for testing and repairing.

4. Step3: Connect to WiFi hotspot

- ① Turn the device off and on again, when the 4G appears on the upper left corner of the screen, then reconnect the WiFi to use the network.

② If your phone supports scanning QR code to connect to WiFi, you can press the side button and the screen will display the "Set-WiFi" QR code, then use your phone's camera to scan the QR code to establish a WiFi connection.

5. WiFi network set but unable to connect to the network

Please check if the WiFi SSID, Password are set correctly.

6. Device's WiFi can't be detected

Notes:

- ① The charging ambient temperature is between 0°C -45°C. Charging in high temperature, humid or fire risk environments should be avoided.

② Store the unit in a dry, well-ventilated environment when it is not in use.

③ It is normal for the equipment to be hot when used, and the equipment can be placed in a cool and ventilated place to cool down accordingly.

7. Networks connected but can't access the internet

The charger should be unplugged when the power supply is finished or has not been used for a long period of time, so as to avoid safety hazards caused by prolonged continuous power supply.

Name and Element of the Toxic and Harmful Substances or Elements in the Products

Harmful substances

Name of part

Plumbum (Pb)

Mercury (Hg)

Cadmium (Cd)

Hexavalent chromium (Cr⁶⁺)

Polybrominated biphenyls (PBB)

Polybrominated diphenyl ether (PBDE)

Others

Wireless data terminals

Others

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user 's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
