This product will update the upgrade system firmware from time to time, if your device cannot be updated and upgraded:

a) Please check if the network connection is normal. Only when the network is normal, Smart Business Travel will update the firmware system.

b) Please check if the power is >30%, and only upgrade the firmware system if the device power is >30%.

Health and safety:

battery

Do not use a damaged charger or battery.

Please use the battery correctly, do not short the battery, this will damage the battery and generate heat, which may cause a fire.

Do not place the battery at high temperatures or throw it into a fire, which can cause an explosion.

The used batteries should be returned to the supplier or placed at the designated collection point and should not be disposed of with household waste.

Battery charging time depends on the remaining battery, battery type, and charger. The battery can be charged thousands of times, but it will gradually wear out. When the standby time is significantly shorter than the normal standby time, please purchase a new battery.

Please use the charger and battery for this device.

Traffic safety

Please turn off the device when refueling. The same applies to places where two-way wireless devices are prohibited. Do not place flammable or explosive materials with this equipment. Internal sparks may cause burning.

Please turn off the unit before the plane takes off. To prevent interference with the aircraft communication system, this equipment is not allowed during flight. The use of this equipment when the aircraft is not taking off shall be subject to the approval of the crew in accordance with the safety regulations.

Operating environment

This special rule should be observed everywhere. Turn off the device if it is forbidden or dangerous.

When connecting your phone to other devices, you should read the user manual to learn more about the safety instructions and prohibit connections with incompatible products.

The ambient temperature for this device should be kept between -10 ° C and 40 ° C.

Electronic equipment

Most electronic devices block radio information and consult the manufacturer for information.

Pacemaker: Keep the phone 6 inches (15cm) away from the pacemaker; the device should not be carried in the chest pocket; if you suspect that the device interferes, turn off the device immediately.

Hearing aid: May interfere with hearing aid work. If there is such interference, please contact the hearing aid manufacturer.

Other medical devices: If you use other personal medical devices, consult the device manufacturer to determine if they are blocking radio waves. Your doctor can help you with this information. If there is a sign in the vicinity of the rehabilitation facility that prohibits the use of mobile phones to access the wireless communication device, please turn off the device.

Other important safety information

 • Please use the original or approved manufacturer's accessories. Use of any unapproved accessories may affect the performance of the device, damage your phone, or even cause personal injury.

• This equipment generates electromagnetic fields. Do not place it near magnetic storage media such as computer disks. Electrical equipment such as nearby televisions, telephones, radios, and personal computers can interfere with the use of this equipment, affecting the performance of the equipment.

maintenance

 • This product has been carefully designed and manufactured with high technology, please use it with care.

 • Do not allow children or pets to come into contact with this device, as this may cause choking or equipment damage.

 • Keep the equipment dry and avoid any liquids entering the inside of the equipment to avoid damage.

 • Do not operate the device with wet hands, as this may cause electric shock.

 • Do not store the device in a high temperature environment, which will shorten the life of the electronic device, damage the battery, or melt the parts.

 • Do not expose your device to strong sunlight to avoid heat.

 • Do not place your device near flammable liquids, gases or explosive objects.

 • Please do not throw, knock on the device, treat the device rudely, it will damage the internal circuit board.

• When cleaning the device, use a damp or anti-static cloth, and do not use a cloth that is dry or static. Do not use chemicals such as cleaning agents when cleaning the surface of the equipment. Please turn off the machine before cleaning.

 • Please do not paint your equipment, the pigment will hinder the normal use of the equipment.

Hazardous substance description

This product is designed and produced with environmentally-friendly materials and technical processes that are easily degradable, easy to recycle, and highly utilized. It follows the national standards and industry standards for the control of toxic and hazardous substances or elements of electronic information products, and achieves the

pollution of electronic information products. Environmental Management Requirements for Control Management Measures.

Statement of rights:

1. It is strictly forbidden to modify, copy, distribute, store and transmit part or all of this manual in any form without the written permission of the company.

2. Under no circumstances shall the Company be liable for any direct or indirect damages resulting from any incident, data or otherwise.

3. All pictures in this manual are for reference only. If there is any discrepancy, please refer to the actual product.

4. The company reserves the right to modify this manual without prior notice.

5. The operating system only supports official upgrades. If the user swipes an unofficial system, the user is responsible for the security risks and losses (the possible risks are: user information is stolen, your location is located, etc.)

Use civilized terms:

Please use civilized language when using this equipment, do not use swear words, proverbs, and be a civilized global citizen.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the

user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
