Q&A

Q1:Why does the music cut in and out sometimes?

A1:-Please make sure there is no obstacle between the earbuds and your device.

-Please make sure there is no Microwave oven/Wifi transmitter around you, which are more likely to produce electromagnetic interference and result in signal interruption.

Note: Keep the device and the earbuds as close as possible to ensure a more stable Bluetooth connection.

Q2:Why these earbuds can not pair with my mobile phones?

A2:-Please make sure the earbuds are full charged and power on.

-Please make sure the bluetooth of your phone is turn on.

-If above 2 points have no problem, please put earbuds into the case again and close the case, hold on for 1min, then open the charging case and reconnect earbuds with your phone.

Q3:How to contact Customer service?

- Email: Aftersaleservice12@outlook.com
- WhatsAPP: +86 158 4684 4485
- Enter the company website

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
