

Hard Copy In-box User Manual [DRAFT]
H36GSA, H36GSB, H36GSC

Product Information

Safety and Compliance Information **Using Your Device Around Other Electronic Devices**

WHAT'S IN THE BOX

- Self-Replenishing Smart Scale

LED indicators

When you're using battery power, the LED will turn off after about 10 seconds to extend the battery life.

White flashing: Device on

Blue flashing: Connecting to Bluetooth or wifi, ready for setup

White solid (wall power only): Connected to wifi

White flashing, then green: Uploading inventory between automatic uploads

Yellow flashing, then green: Successful recalibration

Red flashing (wall power only): Not connected to wifi

Product Specifications

Large: Model No: H36GSC

Medium: Model No: H36GSB

Small: Model No: H36GSA

Electrical Rating: 5V == MAX 500mA

Temperature Rating: 0-35°C

This device can be used on flat surfaces like shelves, pantries, and wire racks. Make sure it's in a spot with a strong 2.4 GHz Wi-Fi connection. For best results, keep it in a temperature-controlled environment (40-80°F or 4-26°C).

This device senses the weight of items and determines when the products are running low. Then, it places a reorder automatically. This device can also provide notifications to the user when the inventory is low.

This device is powered by built-in battery if using wall power instead of batteries, plug in the device with a micro-USB power adapter (sold separately). We also recommend removing the batteries to avoid draining them.

The Device, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices.

While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

FCC Compliance Information

Radio Frequency Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications that are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Information on your device is on file with the FCC and can be found by inputting your device's FCC ID, which can be found on the back of Device, into the FCC ID Search form available at transition.fcc.gov/oet/ea/fccid.

Information Regarding Exposure to Radio Frequency Energy

The output power of the radio technology used in the Device is below the radio frequency exposure limits set by the FCC.

This device should be installed and operated with a minimum distance of 20cm between the radiator and your body.

Recycling Product Properly

In some areas, the disposal of certain electronic devices is regulated. Make sure you dispose of or recycle the Products in accordance with your local laws and regulations. For information about recycling the Products, go to www.amazon.com/devicesupport.
