VENU4 Pro TPMS
Intelligent Detection Tool
Quick Start

1 Product Overview

THINKCAR
VENU4 Pro TPMS Intelligent Detection Tool

2 Equipment parameters

Parameter	Value
Model	VENU4 Pro
Version	V1.0.0
Manufacturer	THINKCAR
Operating System	Android 10.0
Storage Capacity	128GB
Power Supply	5V/2A

3 Equipment setup

1. Connect the device to the computer via USB cable.

2. Install the THINKCAR VENU4 Pro TPMS Intelligent Detection Tool software on the computer.

3. Run the software and select the device model.

4 Download VENU4 mobile app

1. Scan the QR code to download the app.

2. Install the app on the mobile device.

3. Open the app and log in with the account.

4. Connect the device to the mobile device via Bluetooth.

5. Select the device model and start the detection.

1. Product Overview

The VENU4 Pro TPMS Intelligent Detection Tool is a professional diagnostic tool for TPMS. It can detect the tire pressure, temperature, and other information of the tire. It is suitable for various vehicles and can be used in various scenarios.

2. Equipment parameters

Parameter	Value
Model	VENU4 Pro
Version	V1.0.0
Manufacturer	THINKCAR
Operating System	Android 10.0
Storage Capacity	128GB
Power Supply	5V/2A

3. Equipment setup

1. Connect the device to the computer via USB cable.

2. Install the THINKCAR VENU4 Pro TPMS Intelligent Detection Tool software on the computer.

3. Run the software and select the device model.

4. Download VENU4 mobile app

1. Scan the QR code to download the app.

2. Install the app on the mobile device.

3. Open the app and log in with the account.

4. Connect the device to the mobile device via Bluetooth.

5. Select the device model and start the detection.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

IC Warning

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

Cet appareil est conforme aux CNR exemptes de licence d'Industrie Canada .

Son fonctionnement est soumis aux deux conditions suivantes :

- (1) Ce dispositif ne peut causer d'interférences ; et
- (2) Ce dispositif doit accepter toute interférence , y compris les interférences qui peuvent causer un mauvais fonctionnement de l'appareil.

Le dispositif a été conçu pour répondre à la demande générale de radioexposition.
