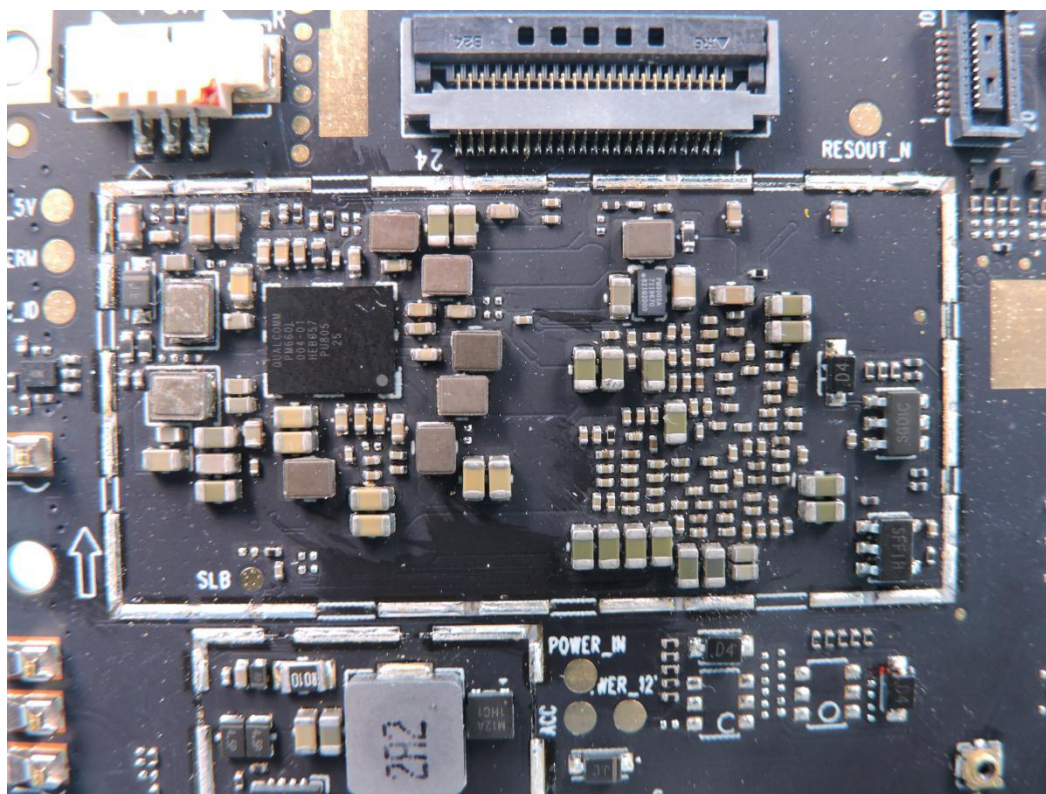

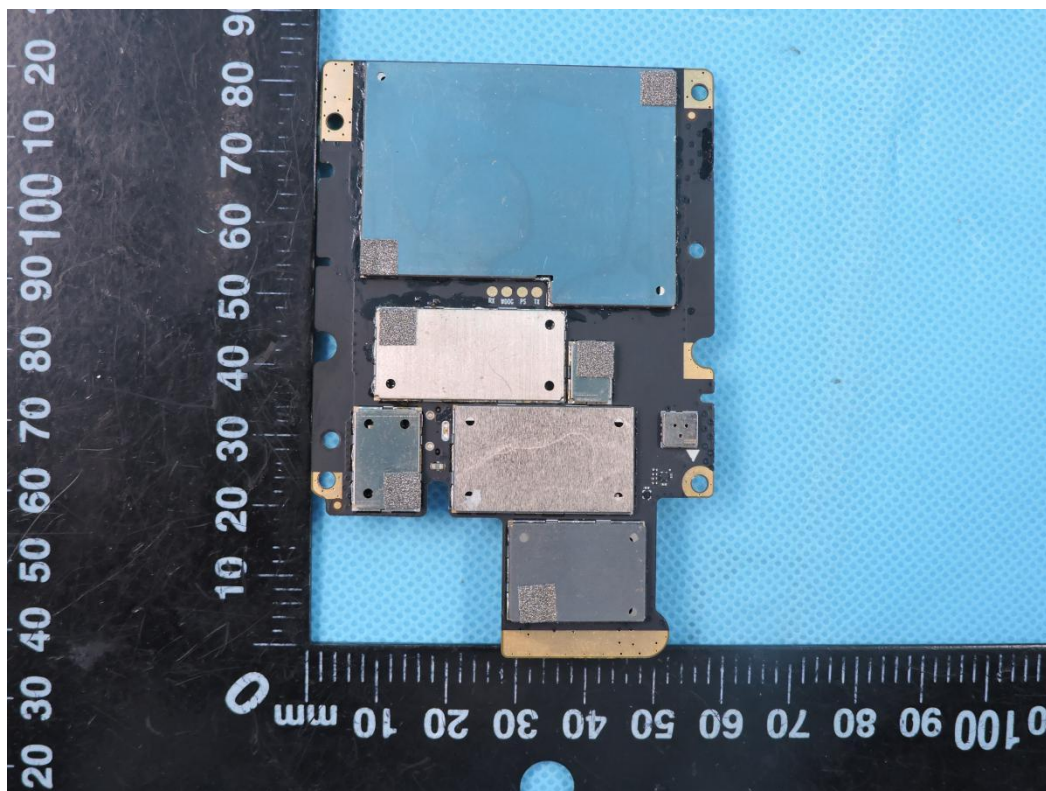

Photo 8

A photograph of a disassembled mobile phone, showing the internal components laid out on a blue surface. A black ruler with white markings is placed horizontally at the top of the image, providing a scale in centimeters (0 to 100) and millimeters (0 to 30). The components include a large black main board with various chips and components, a silver battery with a black label, a camera module with a lens and flash, and a small black component with a white arrow pointing upwards. The main board has several gold-colored connectors and a small gold-colored component labeled 'VIBRO PS TT'. The battery has a black label with a white arrow pointing upwards. The camera module has a lens and a flash. The small black component has a white arrow pointing upwards. The components are arranged in a way that shows their relative positions and sizes.
