The image shows a white Square D SQR14101WCM circuit breaker. The device is rectangular with a central handle and two side handles. It is mounted on a metal base. The top of the device has several terminals labeled '120V', 'Neutral', 'Traveler', and 'Load'. The front of the device has a label with the following specifications:

- SQUARE D
- Traveler
- Load
- 120VAC, 60Hz
- 1000W
- Standard ballast: 1200VA
- Motor: 1/2HP
- Interrupting: 1000A
- Breaker: 15A
- SGR14101WCM

A stainless steel ruler is placed next to the breaker for scale. The ruler shows the breaker is approximately 100mm high. The ruler also has markings for 50, 100, and 150 mm.
