

## FCC TEST REPORT

For

ARTIKA FOR LIVING INC

Dunham Flushmount LED light 5CCT walnut finish

Test Model: FM-DU5C-HD2WN

Additional Model No.: FM-DU5C-XXXXXX("XXXXXX" can be A to Z and/or 0 to 9 and/or blank (commercial code))

Prepared for : ARTIKA FOR LIVING INC  
Address : 1756 50th avenue, Lachine, Qc, Canada H8T 2V5

Prepared by : Shenzhen LCS Compliance Testing Laboratory Ltd.  
101, 201 Bldg A & 301 Bldg C, Juji Industrial Park  
Address : Yabianxueziwei, Shajing Street, Baoan District,  
Shenzhen, 518000, China

## 1. SUMMARY OF STANDARDS AND RESULTS

### 1.1 Description of Standards and Results

The EUT have been tested according to the applicable standards as referenced below.

| Description of Test Item        | Standard                                         | Limits          | Result |
|---------------------------------|--------------------------------------------------|-----------------|--------|
| Conducted emissions on AC mains | FCC 47 CFR Part 15, Subpart B<br>ANSI C63.4-2014 | 15.107, Class B | Pass   |
| Radiated emissions (Below 1GHz) | FCC 47 CFR Part 15, Subpart B<br>ANSI C63.4-2014 | 15.109, Class B | Pass   |

## 1.2 Description of Test Modes

| No  | Title                 | Description |
|-----|-----------------------|-------------|
| TM1 | Working(AC 120V/60Hz) | Record      |

## 2. GENERAL INFORMATION

### 2.1 Description of Device (EUT)

|                             |                                                                                                          |
|-----------------------------|----------------------------------------------------------------------------------------------------------|
| EUT                         | : Dunham Flushmount LED light 5CCT walnut finish                                                         |
| Test Model                  | : FM-DU5C-HD2WN                                                                                          |
| Additional Model            | : FM-DU5C-XXXXXX("XXXXXX" can be A to Z and/or 0 to 9 and/or blank (commercial code))                    |
| Model Declaration           | : PCB board, structure and internal of these model(s) are the same, So no additional models were tested. |
| Power Supply                | : 120V~, 60Hz, 30W                                                                                       |
| Highest Internal Frequency  | : 1.705-108MHz                                                                                           |
| Classification of Equipment | : Class B                                                                                                |

| Highest internal frequency (Fx)            | Highest measured frequency      |
|--------------------------------------------|---------------------------------|
| $F_x \leq 1.705\text{MHz}$                 | 30MHz                           |
| $1.705\text{MHz} < F_x \leq 108\text{MHz}$ | 1GHz                            |
| $108\text{MHz} < F_x \leq 500\text{MHz}$   | 2GHz                            |
| $500\text{MHz} < F_x \leq 1000\text{MHz}$  | 5GHz                            |
| $F_x > 1\text{GHz}$                        | 5 x Fx up to a maximum of 40GHz |

### 2.2 Support equipment List

| Manufacturer | Description | Model | Serial Number | Certificate |
|--------------|-------------|-------|---------------|-------------|
| /            | /           | /     | /             | /           |

### 2.3 Description of Test Facility

The data and results referenced in this document are true and accurate. The reader is cautioned that there may be errors within the calibration limits of the equipment and facilities. The measurement uncertainty was calculated for all measurements listed in this test report acc. To CISPR 16 – 4 “Specification for radio disturbance and immunity measuring apparatus and methods – Part 4: Uncertainty in EMC Measurements” and is documented in the LCS quality system acc. To DIN EN ISO/IEC 17025. Furthermore, component and process variability of devices similar to that tested may result in additional deviation. The manufacturer has the sole responsibility of continued compliance of the device.

NVLAP Accreditation Code is 600167-0.

FCC Designation Number is CN5024.

CAB identifier is CN0071.

CNAS Registration Number is L4595.

Test Firm Registration Number: 254912.

### 2.4 Measurement Uncertainty

| Test Item                                                                                                                                     | Measurement Uncertainty |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| Conducted Emission (150kHz to 30MHz)                                                                                                          | $\pm 2.35\text{ dB}$    |
| Radiated Emission (30MHz to 1000MHz)                                                                                                          | $\pm 3.48\text{ dB}$    |
| Note: This uncertainty represents an expanded uncertainty expressed at approximately the 95% confidence level using a coverage factor of k=2. |                         |

### 3. MEASURING DEVICES AND TEST EQUIPMENT

#### Conducted emissions on AC mains

| Equipment         | Manufacturer | Model No | Serial No. | Cal Date   | Due Date   |
|-------------------|--------------|----------|------------|------------|------------|
