Model: BX-01

The best audio companion for mobile phones, IPADs, laptops, computers, etc.

Main Functional Keys

Power On/Off

Play/Pause/Function Switch

Volume + (long press) / next song

Volume - (long press) / previous song

TWS Pairing Button

Input signal selection button

AUX

AUX-IN

USB

MICRO USB Charging Port

Audio charging:

1. Connect to the 5V/2A USB interface charging head to charge;

2. Charge with a 2A mobile phone charger with a standard USB interface.
3. In the charging state, the red light is always on, and the green light is on when the battery is fully charged.

Audio On:

Press and hold the key to ON to turn on the power. The blue light is on, the blue light is flashing, and there is a mode sound. The power is turned on successfully.

Audio Off:

Press and hold the key to OFF to turn off the power, the indicator light is off, there is a mode sound, and the shutdown is successful.

Audio cable connection:

Plug one end of the $\Phi 3.5\text{mm}$ audio cable that is included with the Bluetooth audio into the AUX connector, and plug the other end into the computer's headphone jack (also connected to the phone, PAD, MP3, etc.) to play music. Adjust the volume in the playback device and enjoy a wonderful music tour.

Tip: When the battery is low, the Bluetooth speaker will emit a low battery alarm (red light), please charge it in time. If it fails to charge in time, it will automatically enter the low power protection state and shut down.

Audio Bluetooth wireless connection playback:

1. After turning on the power, the blue light will be on, the blue light will flash, and the "Enter Bluetooth Mode" sound will be displayed, indicating that the Bluetooth sound is in the wireless discoverable

state. At this time, search for the sound in the mobile phone or PAD.

After the search, the pairing connection will be accompanied by the

“pairing success” prompt and the Bluetooth indicator will turn blue.

Tips: 1) The unit and the device can be connected directly for the next time, no need to pair again (except for unpairing or using a new Bluetooth sound)

2. If you still have not found this Bluetooth audio, you can repeat the above steps to reboot.

After pairing is successful, play music, and select Bluetooth transmission, there is a choice of Bluetooth high quality audio.

After the mobile phone and other devices are successfully connected to the audio and allowed to be automatically connected, if both parties have not been unpaired, they can be automatically connected when they are used again. After the connection is successful, tap a multi-function button to play music. Note: If you have quit Bluetooth, unpaired, or have not been paired, you will not be able to connect automatically.

3. Release of Bluetooth audio pairing

In the Bluetooth state, the audio and mobile phone or PAD are paired or used, the corresponding operation can be unpaired in the mobile phone or PAD, or the Bluetooth speaker power button can be double-clicked to cancel the pairing.

4. Tap the play button to pause the music while playing Bluetooth music; tap the button again to resume playback.

Note: Some media players on your phone or tablet may not support this action.

5. Bluetooth sound volume adjustment

When the Bluetooth audio is played for a long time, the volume will increase slowly. When the maximum volume is reached, there will be a “beep” sound. With a long press , the volume will slowly decrease and become silent when it reaches the minimum volume. 7. Bluetooth sound selection (invalid when wired connection is played)

Press the button , to select the next song to play;

Press the button , to select the previous song to play.

Note: Some media players on your phone or tablet may not support this action.

Bluetooth audio call operation (internal battery or external power supply):

1. Answer the call: When the call is made, press the button  to answer the call.
2. Call rejection: When a call comes in, a long button  is pressed to reject the call.
3. Conference call: During the call, you can turn off the audio MIC by pressing the button  to ensure that the discussion topic is not heard by the other party. Tap to resume the call.
4. The call conversion between the Bluetooth audio and the mobile phone can be performed on the mobile phone.
5. When the button  is pressed, the volume will increase slowly.

When the volume is reached, there will be a “beep” sound. With a long press , the volume will slowly decrease and become silent when it reaches the minimum volume.

Bluetooth speaker TWS (pairing) mode:

This speaker supports two machines connected to form a left and right channel stereo playback mode.

1. When two machines are turned on and no device is connected (blue light flashes), tap any button  to initiate the couplet. The blue light flashes quickly. After the light is on, the connection is successful. The other Bluetooth indicator is flashing and is ready to be connected. At this point, search for this sound in your phone or PAD.

After the search, the pairing connection will be accompanied by the “pairing success” prompt tone and the bluetooth indicator will turn blue continuously. After successful, the stereo music can be played. After the mobile phone and other devices are successfully connected to the audio and allowed to be automatically connected, if both parties have not been unpaired, they can be automatically connected when they are used again. After the connection is successful, tap a multi-function button to play music.

Note: If you have quit Bluetooth, unpaired, or have not been paired, you will not be able to connect automatically.

2. Cancel the TWS (pairing) mode, double-click the power button  to clear the TWS information and the player connection information.

Product Features

Fashionable, stylish and elegant, easy to carry

Multi-purpose machine, hands-free phone, Bluetooth music, cable music

Hands-free phone, radiation away, protect the brain, good for health

Built-in high-capacity lithium battery, long standby, playback and long talk time

Small size, high power, wide range of use

The sound quality is clear, natural, loud and soft.

Dustproof, shockproof, antimagnetic, moisture proof, and high reliability.

Bluetooth's latest 5.0 standard, strong anti-interference and high transmission efficiency.

Advanced echo cancellation and noise suppression technology to ensure high quality sound quality and call performance in the industry

Stable performance, search sensitive, precise, and fast connection.

Specification model: BX-01

Input interface: USB MICRO 5PIN audio connector: Φ 3.5mm audio plug

Resistance: 4 Ω

Charging voltage: DC5V/2A

Output power: 15W

Audio bandwidth: 80Hz-20kHz

Charging time: about 2-3 hours

Play time: about 5 hours or more (50% volume)

In-flight battery: 18650 lithium-ion rechargeable battery / 2500MAH x2

Bluetooth version: 5.0 (A2DPv1.3, AVRCPv1.6, HFPv1.7, HIDv1.1, AVCTPv1.4, AVDTPv1.3, and SPPv1.2 protocols)

Working range: 10 meters (Class 2, Bluetooth standard)

Frequency range: 2400, 2843MHz

Appearance size: Φ 184mm*105mm *105mm

Net weight:

Bluetooth speaker: 1 set

Cable: 1 cable for USB cable + 1 cable for audio cable. Instruction manual and warranty card

Certificate of conformity: 1

Please read this manual carefully and check the accessories of the product before use.

Do not disassemble or strongly squeeze the product to avoid damage.

This product is prohibited from being used and placed around hot and high temperature sources such as fire, heaters, etc.

Do not immerse the product in water or other liquids. When not in use for a long time, it should be placed in a cool, dry environment. It is recommended to charge once a month.

Note: Product specifications are subject to change without notice.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
