

O.G. VIBRATING PANTIES

FEMXTC.COM

QUICK START GUIDE

USING VIBRATING PANTIES

1

CHOOSE YOUR
PANTY
-BLACK
-ROSE
WHITE

2

3

Place O.G. Bullet
into the secret pocket
of the panty

Wear your favorite panty so
laces are on or above hips.
Bows go on back and secret pocket
on front for the O.G. Bullet

4

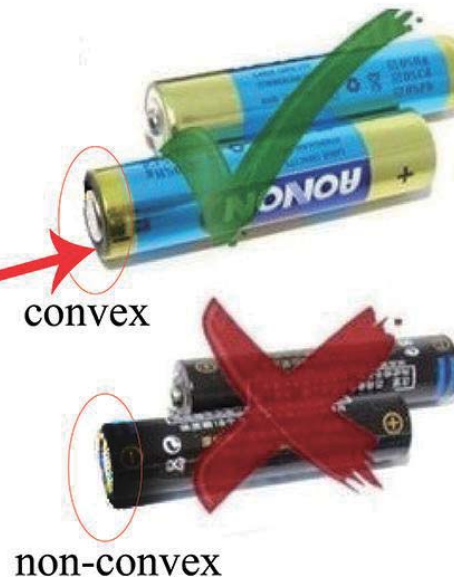

Hand over the remote
your partner and let the
FUN BEGIN!

USE IN A LOUD AREA FIRST TO GET A SENSE
OF THE NOISE LEVEL

FIRST TIME SETUP

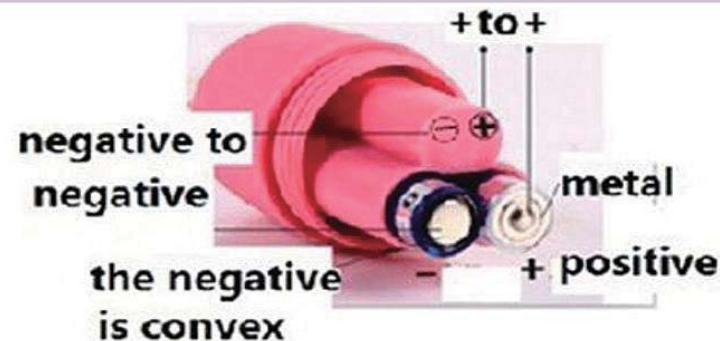

1.

The bullet requires 2 AAA bat-
teries (included). The negative
end of the batteries ***must be of
the bulging kind (convex)***
***such as regular Duracell or En-
ergizer store bought batteries.***
Non-convex batteries do not
complete the circuit and results
in limited functionality.

2.

Must load batteries in the right way. Negative with nega-
tive and positive with positive. Use new batteries and
remove them after use to prolong battery life.

3.

Slide to uncover buttons on the remote. Left button turns the bullet on while the right button powers it off at any time. Pressing the left button each time will result in a different vibration pattern.

4.

Remove the blue protective film on the face of the remote.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
