

# User Manual

Model Number: T4E4AT

## Getting to Know Your Device

Features: built-in smart home hub, motion detection

## Place your Device

Thoroughly clean and dry the location you've chosen for your Device. Then plug the included power adapter into Device and set the device in place.

To give Device room to rotate, place it at least 6" from a wall. If you need to place Device near a wall, don't worry—it can learn to adjust its rotation range.

## Set up your Device

Plug the adapter into a wall power outlet and follow the on-screen instructions to register your Device.

During registration, Device will rotate to calibrate and locate its home position. After homing, you may need to adjust the device so that the display is facing the direction you'll most often see it from.

Slide the included motion footprint template around the body of the device.

Important: This template shows the keep-out space around the device. Always keep this space clear of small objects like cups that may get knocked over.

## Optional: Teach your Device its surroundings

If the motion footprint template is touching or folded against a wall, run the self-mapping sequence so that Device can avoid hitting the wall as it rotates.

## Explore your Device

To access your shortcuts, swipe left from the right side of the screen.

## Important product information

### Safety information

FAILURE TO FOLLOW THESE SAFETY INSTRUCTIONS COULD RESULT IN FIRE, ELECTRIC SHOCK, OR OTHER INJURY OR DAMAGE. Do not expose your device or adapter to liquids. If your device or adapter gets wet, carefully unplug all cables without getting your hands wet and wait for the device and adapter to dry completely before plugging them in again. Do not attempt to dry your device or adapter with an external heat source, such as a microwave oven or a hair dryer. If the device or adapter appear damaged, discontinue use immediately. Use only accessories supplied with the device to power your device. To avoid risk of electric shock, do not touch your device or any wires connected to your device during a lightning storm.

To prevent the device from unexpectedly tipping over, hold the device with both hands when moving or lifting the device. To prevent pinching, keep fingers away from the hinge where the display connects to the base of the device.

Device should be placed on a hard, clean surface. Placing the device on soft surfaces such as carpeting could cause the device to unexpectedly tip over. To avoid risk of unexpectedly tipping over, do not tug or pull at the display of the device.

Ensure that the device in an area that is clear of other objects. If the device comes into contact with objects while it is in use, there is a risk that objects could be knocked over.

To avoid unexpectedly coming into contact with the device, keep fingers and body clear of the device while it is in use.

## Product Specifications

Model Number: T4E4AT

Electrical Rating: 18VDC1.67A

**Temperature Rating:** 32°F to 95°F (0°C to 35°C)

Wireless Features: This device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range. 5GHz Product for Indoor Use only.

## IC Compliance Information

### Radio Frequency Information

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement."

The device could automatically discontinue transmission in case of absence of information to transmit, or operational failure. Note that this is not intended to prohibit transmission of control or signaling information or the use of repetitive codes where required by the technology.

This device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Les dispositifs fonctionnant dans la bande de 5 150 à 5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

### Information Regarding Exposure to Radio Frequency Energy

This equipment complies with IC RSS-102 RF exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.

Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.  
CAN ICES-3(B)/NMB-3(B)

## FCC Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Pursuant to Section 15.21 of the FCC rules, changes or modifications to a Product by the user that are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device meets the FCC Radio Frequency Emission Guidelines. Information on the product is on file with the FCC and can be found by inputting such Product's FCC ID (which can be found on the device) into the FCC ID Search form available at <https://www.fcc.gov/oet/ea/fccid>.

The output power of the radio technology used in the Products is below the radio frequency exposure limits set by the FCC. Nevertheless, it is advised to use the Products in such a manner that minimizes the potential for human contact during normal operation.

This device should be installed and operated with at least 20 cm between the radiator and your body.

The device can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices.

While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

This equipment should be installed and operated with minimum distance 20 cm between the radiator and your body.

## Recycling Your Device Properly

In some areas, the disposal of certain electronic devices is regulated. Make sure you dispose of, or recycle, your device in accordance with your local laws and regulations. For information about recycling your device, go to [www.amazon.com/devicesupport](http://www.amazon.com/devicesupport)
