Columbia, MD 21046

To whom it may concern:

Avuity LLC, hereby requests a Permissive Change Class II of the radio equipment certification for the VuAIC2 Sensor certification number, FCC ID: 2AUPP-VUAI01. This product differs from the originally approved product in the following manor:

(a) We are increasing the power of the transmitter to extend the range of the product; however, we are only increasing it within the limits of what has already been previously approved. We are not increasing the power to be higher than that which was originally approved.

I do attest that the Field strength and/or RF Output readings are lower than the originally approved product, therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in red ink on a black rectangular background. The signature is stylized and appears to read 'Ian Iliff'.
