Solder Board-Component View 4	 A photograph of a small, dark-colored printed circuit board (PCB) component, identified as a ZS-FILTERKEY-CBA. The board is shown against a blue background with a black ruler for scale. The ruler has markings in millimeters (0 to 50 mm) and centimeters (10 to 40 mm). The PCB features various components, including a large rectangular component labeled '0-94V-0', several smaller components labeled 'TP19', 'TP16', 'TP20', 'TP15', 'TP24', 'TP25', 'TP26', 'TP22', 'TP29', 'TP23', 'TP18', 'TP17', 'TP31', 'TP21', 'TP27', 'TP28', 'TP30', and 'TP32'. There are also labels for 'HI', 'KI', 'K3', 'K5', 'F4', 'GND1', and 'H2'. The board is connected to a red wire and a black wire.
Solder Board-Component View 5	 A photograph of the same PCB component from a different perspective, showing the underside. The board is dark-colored and features a large, square, gold-colored component, likely a filter or a connector. The board is shown against a blue background with a black ruler for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (20 to 80 mm). The board is connected to a red wire and a black wire.

Solder Board-Component View 6	 A photograph of a small, rectangular electronic component, likely a sensor or microcontroller, mounted on a blue fabric surface. The component is gold-colored with a square pad on one end and various components on the other. It is positioned next to a black ruler with white markings, showing its size. The ruler has markings in millimeters (0 to 100) and centimeters (0 to 10).
Solder Board-Component View 7	 A photograph of a blue rectangular component, possibly a battery or a small PCB, mounted on a blue fabric surface. The component has a black label with text and a barcode. It is positioned next to a black ruler with white markings, showing its size. The ruler has markings in millimeters (0 to 100) and centimeters (0 to 10).
