How to charge the charging compartment and headphones

Charge the charging compartment: Before first use, place the headset on the charging compartment body and connect the "Type-C" cable to charge the charging compartment.

Charge the headset: Put the headset in the charging compartment where the headset is charging.

Note: Charging the charging compartment LED number will flash, when charging the headset, the headset's breathing

light will also turn red light, the headset battery is full, the breathing light automatically turn off.

Power on/off

Power on: open the charging compartment cover, the headset will turn on automatically (the headset needs to be powered on), or long press the touch area for 3 seconds with "Power on" prompt (flashing blue light) when it is off.

Power off: as the power on state, put the headset into the charging position of the charging compartment and close the cover with the blue light flashing, then shut down or press the touch area for 7 seconds to shut down.

Charging the cell phone by the charging compartment

This product has the function of power bank. Connect the charging compartment with the mobile phone according to the figure below to charge the mobile phone.

How to connect TWS headset with mobile phone

After the headset is taken out from the charging compartment, the headset will turn on automatically, wait until the left ear (main ear) flashes red and blue alternately, and the right ear (auxiliary ear) flashes once in 7 seconds. At the same time open the Bluetooth list of mobile phone, find "SM-01" and click Connect. After the connection is successful, the headset pairing is successful. The left and right ears (main and auxiliary ears) breathe once for 7s. After each use, just take out the headset, and the headset and the mobile phone will automatically connect and pair. The headset is not connected to the mobile phone

within 5 minutes, and it will be automatically turned off.

Basic operation mode of L/R headset

Reject call: Double click the touch area 2 when calling (both left and right ears can).

Answer / end calls: When calling, click the touch area to answer the call, and then click the touch area to end the call.

Song switching up and down: In music mode, press and hold the touch area of the right headset for 2 seconds to hear a "beep" and release, that is, switch to the next song. Press and hold the touch area of the left headset for 2 seconds, and when you hear the "beep" and release, you will switch to the previous song.

Music pause / play:

In music mode, click music pause in the touch area of L / R headset, and then click play.

Volume up and down (+ / -): When entering the music playing mode, when you click twice right with "beep" prompt (interval 0.4 s), the volume +, when you click twice left with "beep" prompt (interval 0.4 s), the volume -.

Set wake-up call: When the headset is connected to standby mode, click the right headset button 3 times.

Language switching: Turn off the Bluetooth device connected to the headset, take out the charging box of a single headset, place the other headset in the charging box or manually turn off the headset, and then three clicks on the L / R headset touch area (Japanese and English switching).

Turn on / off the breathing light: When the headset is connected to the mobile phone (no music or call is played), touch the right ear for 3 seconds to turn off the breathing light, touch the left ear for 3 seconds to turn on the breathing light, and release it after hearing the

prompt of "beep".

Principal and subordinate switching: If one headset is powered off or disconnected, the other headset can automatically reconnect and all functions can be used normally.

Pairing mode of left and right earphones

1. L is the left ear, R is the right ear.
2. To disconnect the headset from your phone or other Bluetooth device.
3. Restore the factory settings: in the standby state, long press the touch for 5 seconds (L / R) to enter the pairing state, the red and blue lights flash alternately, and the red light flash once to shut down after clearing for 3 consecutive strokes (each interval cannot exceed 0.4 seconds).
4. After restoring the settings, put the headphones into the charging compartment and take them out when the red light is on. The left and right headphones can be paired automatically. The left ear flashes red and blue alternately, and the right ear flashes once every 7 seconds, indicating that the pairing is successful.

Headphone indicator description:

Power on pairing: red and blue flash alternately in the left ear and once in 7 seconds in the right ear.

Low power warning: red light once every 10 seconds.

Charging: in charging, red light is on, fully charged, indicator light is off.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
