

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT) on a blue background. The components include a white circular top cap, a white dome-shaped housing, a white circular base with a black circular area, and a green printed circuit board (PCB) with various electronic components. A black ruler with white markings is placed vertically and horizontally for scale.
Solder Board-Component View 1	 A photograph showing a solder board component on a blue background. The component is a small, circular metal base with two mounting holes and a central solder point. A multi-colored ribbon cable is attached to the component. A black ruler with white markings is placed vertically and horizontally for scale.

Solder Board-Component View 2	 A photograph showing a small, circular electronic component with a white top and a blue base, mounted on a blue PCB. The component has two gold-colored pins on the left and a multi-colored ribbon cable on the right. It is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is positioned near the 10 mm mark on the ruler.
Solder Board-Component View 3	 A photograph showing a small, rectangular electronic component with a green top and a white base, mounted on a blue PCB. The component has several gold-colored pins on the left and a multi-colored ribbon cable on the right. It is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is positioned near the 10 mm mark on the ruler.

Solder Board-Component View 4	 A photograph of a small, green, rectangular component labeled "MV-PWR-HL V5.0" mounted on a blue solder mask. The component is positioned between two black rulers with white markings. The vertical ruler on the left shows measurements from 0 to 100 mm, and the horizontal ruler at the bottom shows measurements from 0 to 100 mm. The component is approximately 10 mm wide and 5 mm high.
Solder Board-Component View 5	 A photograph of a larger, circular component with a complex internal circuitry, including various chips and components. The component is mounted on a blue solder mask. It is positioned between two black rulers with white markings. The vertical ruler on the left shows measurements from 0 to 100 mm, and the horizontal ruler at the bottom shows measurements from 0 to 100 mm. The component is approximately 40 mm in diameter.

Solder Board-Component View 6	 A photograph of a circular printed circuit board (PCB) component, likely a module, resting on a blue textured surface. The component is surrounded by a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The component itself is dark with various electronic components, including a central square chip, several smaller chips, and solder points. The ruler markings show the component is approximately 60mm in diameter.
Antenna View	WIFI Antenna  A photograph of the same circular PCB component, showing the antenna side. A red rectangular box highlights a specific area on the component, which is the WIFI antenna. A red line points from the text 'WIFI Antenna' to this box. The component is placed on the same blue textured surface with the same black ruler for scale. The ruler markings are consistent with the previous view, showing the component's size.
