QI BAO 4 accepts only nano size SIM card.

Mini
SIM

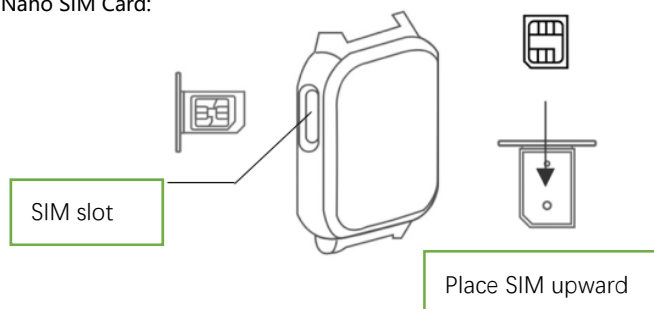

Micro
SIM

Nano
SIM

Install Nano SIM Card:

- (1) With your nano SIM card's gold contacts facing up, place card into SIM holder tray.
- (2) Make sure the tray is facing up so that your card doesn't fall out.
- (3) Steadily slide the tray all the way into the slot.

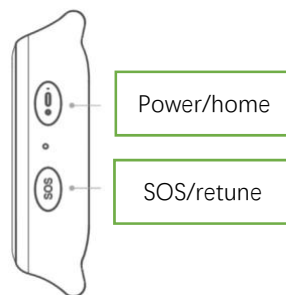

04 watch Button

Power / Home Button

1. Press and hold for 10 sec to turn it on and off
2. Short press to turn the home menu

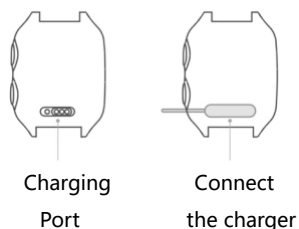

Return /SOS Button

1. Press and hold for 5 sec to initial SOS
2. Short press to turn the previous menu

05 Power Charge

- (1) Use only QI BAO authorized magnetic charging cable.
- (2) Connect the magnetic charger as shown below.
- (3) Charge for the watch more than 15 minutes from complete power off before use. Please use an output voltage of 5V and current above 500mA.

06 Download QI BAO app

QI BAO app is available in Apple and Google app store. Search the app by "360 kids watch" .

NOTE: Please ensure that you download the correct app for your QI BAO watch.

Activation procedure:

- (1) Ensure the SIM is active with sufficient voice and data allowance.
- (2) If necessary, charge the watch.
- (3) Open kids watch app and create your guardian account if it is the first time.
- (4) From the app, scan QR code to be shown on the watch screen.

(5) Provide your child's profile information
as well as the phone number of the watch.

(6) Once it's successfully connected, the watch may take a few minutes to fully synchronize with the app.

NOTE: The service performance may vary by the mobile network coverage. Feel free to contact us via

<https://www.360.cn> for further assistance.

07 Declaration of Conformity

QI BAO hereby declares that this QI BAO smartwatch phone for kids (Model name: QI BAO 4) is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

A copy of the original declaration of conformity can be found in <https://www.360.cn>. Alternatively you may contact QI BAO customer support via <https://www.360.cn>

Highest SAR value: 0.351 W/kg (limbs) SAR limit: 4.0 W/kg.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This Smart Phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue for front of face and 4.0 W/kg averaged over 10 gram of tissue for wrist. Device types: A1 (FCC ID: 2AV3DW901O) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for Front of face is 0.261W/kg and when properly worn on the Wrist is 0.351W/kg.. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
