

-INSTRUCTION GUIDE-

PAGE 1

1. Turn the power switch OFF and replace your existing porch light bulb or lamp bulb most visible from the road with The Locator bulb.
2. Download the FREE Locator app from your App Store, create your account with email/password and allow ALL notifications.
3. Once downloaded, place The Locator app icon beside your existing phone app icon (see below image).

4. Ensure your home WiFi (requires 2.4GHz) is connected to your phone and open The Locator app. Select the settings page if not taken there directly.
5. Turn the power switch to The Locator bulb off and on slowly (2-3 times) until the bulb begins to slowly pulse in brightness. Then, follow the prompts to finish connection. Once connected, the bulb should remain a constant bright white.
6. Use the ON/OFF toggle switch on the settings screen to turn the porch light on and off. DO NOT TURN THE LIGHT OFF WITH THE POWER SWITCH. THE LIGHT SWITCH MUST REMAIN ON TO WORK AS INTENDED.

PAGE 2

7. Should a call to 911 be needed, simply press The Locator app icon located beside your existing phone app icon. This will take you to The Locator home screen where you will press the large phone icon in the center of the screen. This will take you to the dial pad where you will dial the number and press send. (The call to 911 must be made within The Locator app to work as intended)
8. Once a call is made, the app will send a push notification that will alert you that The Locator has been activated. It will ask if you wish to "disarm" the light. It will send these notifications every 10 minutes until you select "disarm". DO NOT DISARM UNTIL HELP ARRIVES. Once help arrives, simply go back to the home page and press "disarm" or select "disarm" on the push notification.

9. DISCLOSURE: The Locator is intended to be used as a locating device to help emergency responders responding to a 911 call for help. It is not designed to be used for any other purpose and DOES NOT take the place of visible house or mailbox numbers. It is the responsibility of the homeowner to ensure their address is displayed adequately.

Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or

or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be located or operating in conjunction with any other antenna or transmitter.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

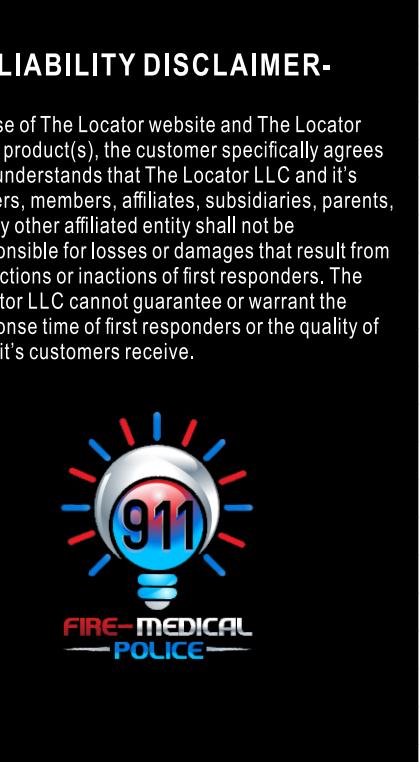

FCC ID: 2AV47LOCEL
