## FCC Class II Permissive Change Request Letter

Date: 13.June 2025

To: Federal Communications Commission  
Authorization and Evaluation Division  
7435 Oakland Mills Road  
Columbia, MD 21046-1609

**RE: FCC Permissive II Change Request for Company: KROHNE Messtechnik GmbH FCC ID: 2AV6KH**

We are submitting an application for an FCC (Class II, Class III) permissive change of the Company name: KROHNE Messtechnik GmbH, product description: Level Probing Radar with BTLE (FCC: 2AV6KH, Original Grant Date: 2025-04-07). The transmitter itself has not changed. Here are the changes:

Following variants shall be added to the pre-certified parent:  
IP68 (DN70), Standard (DN70), Local Display (DN70)

All variants have the same electronic board with a mounted horn antenna, which is plugged into the housing. The lower part of the variants contains the horn antenna and differs due to the dimensions of the horn antenna between DN40 and DN70, where the DN40 horn antenna smaller than the DN70 horn antenna.

Sincerely,

Title: KROHNE Messtechnik GmbH
