

MODULAR APPROVAL LETTER
FCC ID:2AV7W-CB2S

Modular Approval Requirement	Yes	No
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	please see exhibition external photos	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	the modular has buffer modulation /data inputs	
(iii) The modular transmitter must have its own power supply regulation.	The EUT has its own power supply regulation, please see the Schematic Diagram.	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	The EUT meets the FCC antenna requirements; unique antenna connector and photo of antenna are shown in the test report.	
(v) The modular transmitter must be tested in a stand-alone configuration	The EUT was tested with a test board, Please see test report and setup photo	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Please see exhibition label sample for the FCC ID of this module. And also in the exhibition Users manual, there are instructions give	

xiamen Tenia Lighting & Electrical Co., Ltd.

	to the OEM on how to label the end product	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The EUT is compliant with all applicable FCC rules. Details instructions for maintaining compliance are give in the User Manual.	
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	The EUT complies with RF exposure requirement.
