a) Turn lamp on/off

b) Select duration of disinfection process 15 Min, 30 Minutes or 60 Minutes.

2. Once the disinfection lamp is powered on, leave the room & close the door.

3. On completion of disinfection process, lamp will be automatically turned off.

Product name: UV disinfection lamp

Rated power: 38W

Rated voltage: 110V

Feature: Timer using remote control

Lamp life: 8000 Hours

PRODUCT FUNCTIONALITY:

The UV disinfection table lamp mainly acts on the DNA of microorganisms, destroys the DNA / RNA structure, and makes it lose the function of reproduction and self-replication to achieve the purpose of sterilization. 38W is suitable for sterilization and air purification in 450 square ft room. When used effectively can protect from various DNA / RNA-like viruses and bacteria such as Candida albicans, Staphylococcus aureus, E. coli, etc.

1. Do not look directly at the UV light source. It should be used under the condition of no one, no pets, and no plants. Due to strong external radiation, it may cause skin erythema, irritation of the conjunctiva, and fatigue.

2. Prolonged exposure to ultraviolet rays can damage skin and eyes. Doors and windows must be closed during disinfection process with no living being in room i.e. People, plants and animals.

3. Open the door to ventilate and enter the room at least 30 minutes after the disinfection with the ultraviolet disinfection lamp.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
