“To Whom It May Concern”

This letter is to state that, Talaria TWO INP1012 is a variant of INP2045 Module certified under FCC ID: 2AVAL-INP2045 & ISED ID: 25715-INP2045

INP1012 modules has the same RF hardware circuitry as INP2045 Module.

Difference from original filling is INP1012 variant module has a SMA antenna module with a gain of 2.15dBi.

These changes do not affect RF performance of characteristics and thus since the modules have no change in RF design and intended use, the conducted test data from Test Reports: INNOP_005_19001_15.247_BT_DTS & EMC_INNOP_005_19001_15.247_WLAN are still representative for INP1012 and thus these reports are leveraged for FCC/ISED compliance of INP1012.

Best Regards
