

Federal Communications Commission  
 7435 Oakland Mills Road  
 Columbia, MD 21046-1609

**Date: 07/09/2021**

**FCC-ID: 2AVAL-INP2045**

### **TO WHOM IT MAY CONCERN**

Pursuant to Paragraphs FCC part 15.212, we herewith declare for our module.

<b>Modular approval requirement</b>	<b>Yes</b>	<b>No</b>
(a) The radio elements must have the radio frequency circuitry shielded. Physical/discrete and tuning capacitors may be located external to the shield, but must be on the module assembly.	X	
(b) This modular transmitter has buffered input data according the definition of DA00-1407 and complies with Part 15 requirements under conditions of excessive data rates or over-modulation.	X	
(c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module.	X	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);		X
(e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be located inside another device during testing.	X	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements).	X	
(g) The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee;	X	

(h) The module shall comply with applicable FCC RF exposure requirements, which are based on the intended use/configurations.	X	

Best Regards,
