

FCC Statement:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ISED Statement

This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'appareil contient un ou plusieurs émetteur(s)/récepteur(s) qui sont conformes aux CNER d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage.
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Safety and Cautions

- *Never run the model on public roads or crowded areas without caution.
- *To prevent property damage and/or personal injury, never run the model in crowded areas, near or toward people or animals.
- *Never run the model near high-voltage power lines.
- *Make sure that no one else is using the same frequency in your control area, taking the same frequency at the same time, can cause loss of control with R/C model, leading to serious accidents.
- *To avoid a runaway R/C model or loss of control, always follow the procedure below:
1. Turn on the transmitter antenna.
2. Switch the transmitter on.
3. Switch on the R/C model.
4. Follow the remote control instructions.
5. Follow the remote control instructions.
6. Never touch the transmitter when the transmitter is on.
7. Never touch the transmitter when the transmitter is on.
8. Never touch the transmitter when the transmitter is on.
9. Never touch the transmitter when the transmitter is on.
10. Never touch the transmitter when the transmitter is on.

Caution when handling batteries

- *Do not dismantle the battery or charger and do not cut and battery cables.
- *Always the battery may cause short-circuit and/or damage to the product.
- *Charge battery with compatible charger following proper procedure outlined in the instructions. Do not modify charger or change battery in improper way.
- *Do not recharge battery if it is still warm from use as it may damage the battery.
- *Allow the battery to cool off prior to recharging.
- *Make sure to disconnect charger from R/C model and electrical outlet when not in use.
- *Remove transmitter battery when not using it for a long period of time as it may leak and damage transmitter.
- *Never inhale used batteries as they can explode causing serious accidents.

Safety precautions

- *Do not operate the model on public roads in crowded places or near children. It may cause accidents or injury.
- *The product includes small and sharp parts, assemble and store the product only in places out of the reach of children.
- *The front end of the antenna may be dangerous, do not aim it toward faces.
- *During and after operation, the motor will get hot. Please do not touch it until it has had time to cool down.

Troubleshooting

Description	Cause	Solution
The car does not operate at all.	Transmitter or receiver is off. Batteries are not inserted properly in the transmitter. The drive battery is not charged enough.	Turn on both transmitter and receiver. Place batteries in the transmitter properly. Charge the drive battery.
The car does not follow your operation and control distance is not long enough.	Someone else is using the same radio frequency as you are using. There is not enough power in the transmitter or receiver battery. Antenna not fully tightened on the transmitter fully extend.	Change your radio frequency to the one no one else is using, wait until the driver using the same radio frequency before driving or drive your car at a different place. Replace the transmitter batteries with new ones and charge the drive battery. Make sure to insert the antenna into the transmitter and fully extend the antenna.

CAUTION

- * Please review the operation manual and packing explanation to install and use, some parts should be installed by adults.
- * The product contains small parts, which may cause choking.
- * Never run the R/C model in the rain or wet areas, it may cause electronic parts to malfunction.
- * Dispose of the package appropriately and keep out of reach of children.
- * Inspect the RC car for damage to the charge, wire, plug, body, oil or other parts prior to operation. If damage is found, repair the broken parts before use.
- * The charger, battery box and battery must be only be used with the designated Speed RC charging system.
- * This product must only be used with the original Speed RC charger.
- * This product may be dangerous to the children.

PRACTICE AND MAINTENANCE

Operating program

1. Turn on the power switch **1** on the remote and make sure the power indicator **2** flashes red, then turn on the model car's power switch.
2. Gently trigger the remote control to observe if the car can move forward and backward.
3. Turn the remote control steering wheel **4** to the left or right and make sure that the front wheels' steering follows the command.
4. The model car on the ground, and standing behind the model car, gently hook the remote control throttle trigger **5**. If the model car does not go straight, rotate the remote control front wheel trim **6**. The model car to the right side, the front wheel turns the trim to the left, the model car leans to the left, and the front wheel turns to the right to rotate until the model car can go straight.
5. Throttle speed adjustment **7** can adjust the model car speed, rotate to the right, hook the trigger model car speed becomes faster, turn left, hook the trigger model car speed becomes slower.
6. If everything operates OK, the SPEED RC is ready to run.
