Columbia MD 21046

SUBJECT: Class II Permissive Change for FCC ID: 2AVDZEM75

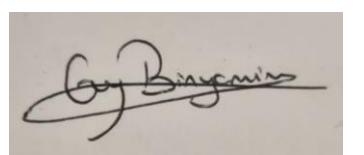

The intention of this application is to enable the modular FCC ID: **2AVDZEM75**, granted on **04/21/2022** to be integrated in **Live Video Transmission System**, Model: **LU800**.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: **2AVDZEM75** was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary. Software security remains unchanged from the original application.

Meanwhile, when module integrated host platform mentioned above, will disable LTE Band 30/LTE Band 48 operation permanently when sold in United States by software. LTE Band 30/LTE Band 48 operation will not be enabled/overridden by end users via any other mean.

Except for the change above, the design, hardware and implementation are exactly same with original.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Guy Binyamini", is placed within a rectangular box. A horizontal line extends from the bottom of the box to the right.
