

Test Positions

Front Side (Separation distance of 0mm)	Back Side (Separation distance of 0mm)
 A close-up photograph showing the front side of a mechanical test setup. A white, cross-shaped base is mounted on a stand. A grey cylindrical component is positioned on top of the base, secured by a blue strap. A black circular object is visible in the foreground, partially obscuring the base. The background shows a laboratory setting with white containers and a wooden pallet.	 A close-up photograph showing the back side of the same mechanical test setup. The components are identical to the front view, but the perspective is from the opposite side. The black circular object is still visible in the foreground.
