

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden desk holds a spectrum analyzer. To its right, on the floor, is a power supply unit with various cables connected. A large, light-colored wooden panel stands on the right side of the setup.
Radiation Emission View(Below 1GHz)	 A photograph of a radiation emission test chamber. The walls are lined with white, square-shaped electromagnetic interference (EMI) shields. A yellow, octagonal-shaped test object is positioned on a stand in the center of the chamber. Several vertical metal rods are visible on the left side.

Radiation Emission View(Below 1GHz)	A photograph of an anechoic chamber interior. The walls, floor, and ceiling are covered with white, square-shaped electromagnetic absorbers. A yellow, rectangular test table is positioned in the center. A laptop computer is placed on the table, displaying a blue screen. Several vertical metal poles are visible on the left side of the chamber. The floor has yellow and black striped safety markings.
Radiation Emission View(Above 1GHz)	A photograph of the same anechoic chamber interior, but with a different setup. The yellow test table is still present. The floor is now covered with blue, pyramid-shaped electromagnetic absorbers. A red object, possibly a piece of equipment or a sign, is visible on the right side of the chamber. The walls and ceiling remain covered with white, square-shaped absorbers.
