

Page 1 of 3

The image shows a green PCB with various components. Key features include:

- ICs:** A large black IC in the center, and a smaller IC labeled "STM594V-AE207844" on the left.
- Capacitors:** Several electrolytic capacitors, including two large ones at the top left and two smaller ones at the bottom left.
- Inductor:** A large yellow toroidal inductor in the center.
- Connectors:** A USB connector at the bottom center, and a red header connector on the right.
- Labels:** "STM594V-AE207844 2.7V 33" is printed on the left. "106479653 C" and "LITHIUM-ION" are printed on the bottom right.
- Other components:** A blue electrolytic capacitor, a black electrolytic capacitor, and several smaller surface-mount components.
