

Fazua evation Pedelec Drive Unit

Components including product labelling with FCC ID.

evation **Remote fX** (with Bluetooth Module inside)

The marking on the back of the remote control is not visible to the end customer when installed.

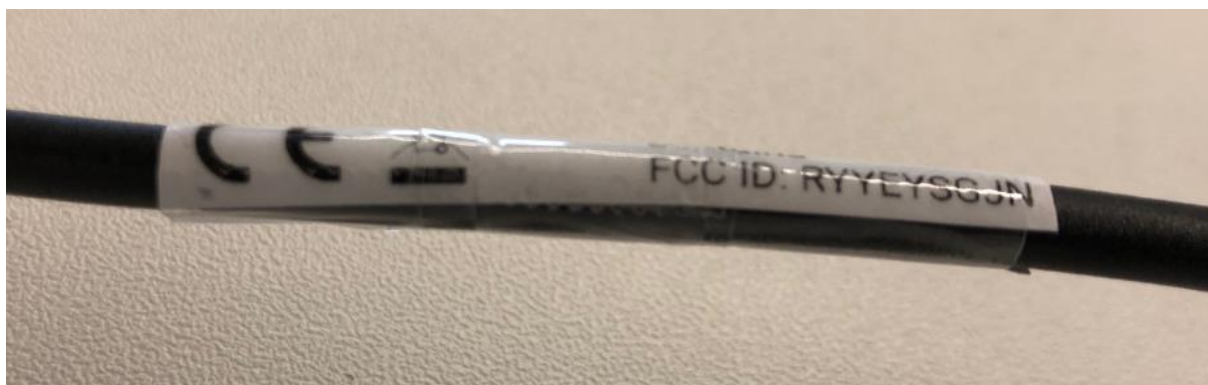

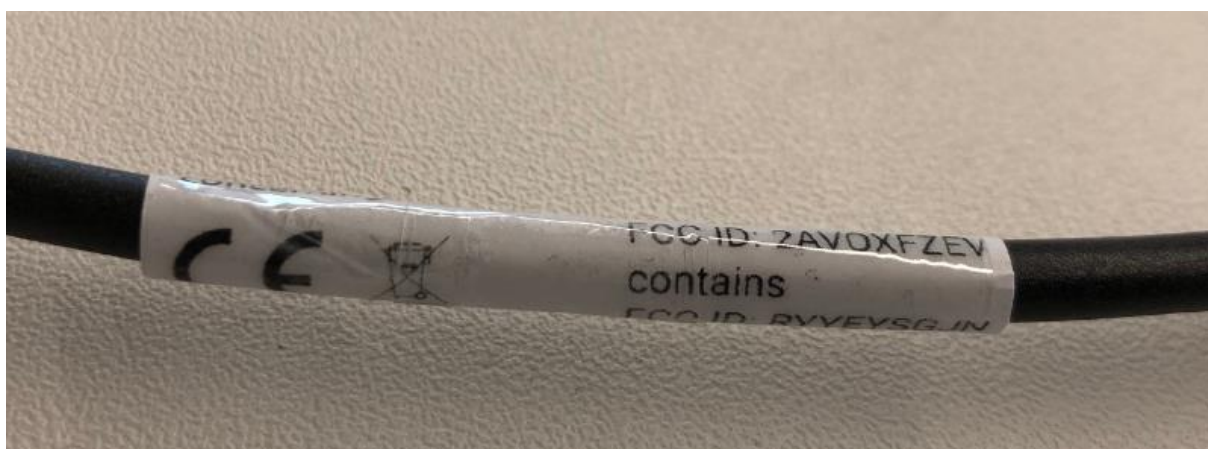

Therefore the better solution for product marking is the following:

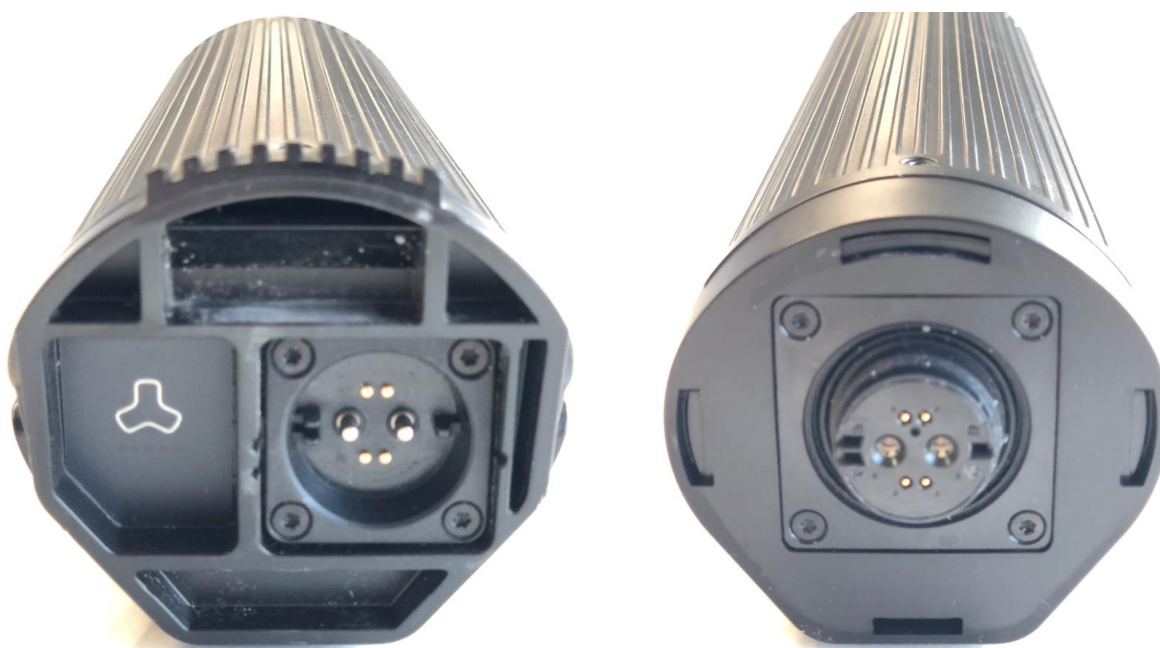

The remote is installed in the pedelec frame. The marking will be permanently visible to the end customer. Marked with permanent adhesive foil sticker – water resistant, temperature solid and printed on both sides.

Second possibility is to apply the sticker on the cable sheath.

The other components of Fazua evation Pedelec Drive Unit and their product marking are visible for the end customer.

evation **Battery 250 X**

evation **Drivepack** (motor unit)

evation 12 V Connector Box

evation **Bottom Bracket**
