Subject: Limiting of Sales to Customers Aware of Licensing Requirements

To Whom It May Concern:

This letter is being provided to explain that CODAR limits sales of the SeaSonde oceanographic high frequency radar systems to customers who understand that by operating their SeaSonde, they are performing measurements of distance, direction and speed of ocean surface currents and waves by means of radiolocation. Before purchasing a SeaSonde the customer must demonstrate they are aware of the need for licensing before transmitting.

Best Regards
