Owners Manual

Step 1 Pairing

A. Turn the remote on with the power switch located at the side. The blue LED light will flicker.

B. Turn on your phone's Bluetooth setting & connect to " **UBeesize** " in the available devices list. The blue LED light will stop flickering when connected.

Step 2 Using

Open your phone's camera app. Press the button associated with your phone's operating system (iOS for iPhone, Android for Android Phones).

Note: If your camera does not respond it may not be compatible. In this case, download the free app "Camera 360" and use this camera app with the remote.

Step 3 Filming Videos

Switch your phone's camera into Video mode first. Press the button to start/stop recording videos.

Note for Samsung Cell Phones:

1. Go to camera setting, scroll down and tap "Volume keys function" and choose "Record video".
2. Open the native camera, click the iOS button (Not android) to start the video, click again to stop the video.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
