3. Key Open Area
4. Password Area
5. Battery Compartment Area
6. Anti Lock Knob

Basic Parameters

Door Opening Method: fingerprint, card, password, APP, mechanical key

Storage Capacity: 100PCS of door cards + fingerprints + passwords

Working Voltage: 3 No.7 AAA alkaline dry batteries

Battery Life: Up to 1 year (unlock 10 times a day)

Working Temperature: -20℃ ~ 70℃

Working Humidity: 40%RH ~ 80%RH

Fitting category A: single latch

Door Thickness: 30mm-80mm

Door Prep: 54mm diameter face hole &25mm diameter latch hole

Daily Maintenance

• Installation environment: requires at least a canopy, do not keep the lock completely exposed in open air.

• Please do not scratch the fingerprint identification area with a sharp object.

• Please exchange both three batteries at the same time, do not use mixed new batteries with old ones.

• The mechanical key is a measure for emergency door opening, please keep at least 1 mechanical key in a safe place other than home(e.g. office, parents' house).

• Please adjust the door or door frame in time if it deforms, otherwise the latch will not enter the door frame hole position smoothly.

Instructions

Note: Please install 3 x No.7 AAA alkaline dry batteries before use.

Download APP:

Log in AppStore/GooglePlay to search "YEEUU" and download the APP.

Add device:

Register and log in "YEEUU" account; click "Add Device" or click symbol "+" at the upper right corner on "Home page"; select "Auto Scan" to start searching; after the device is searched, click "next" to connect the lock to be added.

Add/use fingerprint to open the door(Applicable fingerprint version):

Log in "YEEUU" APP; select the device and enter "Settings" page; click "Fingerprint Management" to enter the page; click "Add Fingerprint" at the upper right corner and put the finger on the fingerprint identification area for admission.

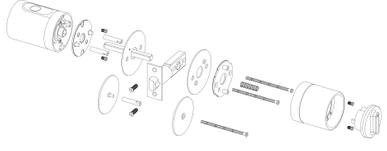
Installation Intro



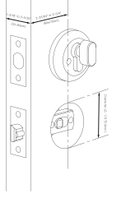
Installation Steps

1. Door hole prep

1) After confirming that both the outside and inside of the door of the original lock are both upper and lower panels, remove the original latch bolt lock body.

PS: After the installation, the deadbolt in picture one has no further use, you can choose whether to use the front and rear decorative covers to cover or not.

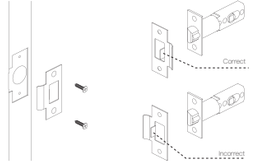
2) Confirm the door thickness and door hole size meet the following parameters.



2. Install the plate

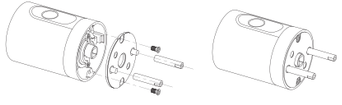
This step is only for new doors or doors need to be reinstalled.

(PS: The direction of the gusset plate should be face to the slope of the lock tongue.)

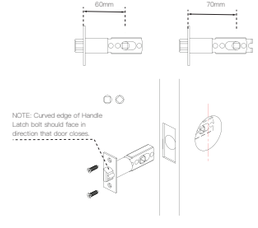


3.Install the front handle

Assemble the front cover: fix the bolt on the front cover and tighten with the handle screw M4 * 8;



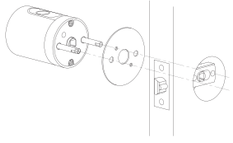
4.Install the lock body



5.Install the front handle

1) Align the screw of the front handle with the round hole on the lock body and install it on the door.

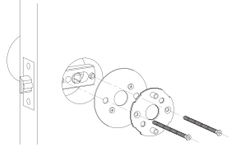
(Be aware that the fingerprint side is facing upwards, choose whether to use the front baffle according to the size of the door hole.)



2) Install the back baffle

(Cut the bamboo screws according to the door thickness , be aware that the length of the screw should be less than 10mm of the door.

according to the size of the door hole, choose whether to use the back baffle according to the size of the door , the bolt should be face outward.)



3) Install the square pole and test

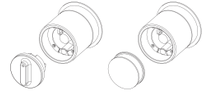
Select the square pole inserted into the square hole of the front handle, put on the auxiliary ring, and check whether the square pole rotates flexibly.

6.Back handle installation

1) Install the square rod spring into the center hole of the back handle.

2) Remove the lock knob cover of the back handle and fix the back handle to the door with screws.

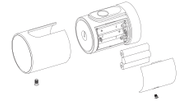
3) Select the lock knob cover or back decoration cover for installation according to the requirements.



7. Install the battery

1) Remove the battery cover, install three AAA batteries, tighten the screws after installing the battery cover.

2) Install the cover.



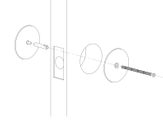
8.Install the front and back decorative cover

PS: Based on your needs.

1) Assembling the front decorative cover

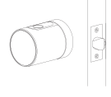
2) Cut the bamboo screws according to the door thickness , be aware that the length of the screw should be less than 10mm of the door.

3)Assembling the back decorative cover.



9. Testing Operation

Remove the cover, insert the key and turn 90 degrees, then try the front and back handle in turn, and check the movement of the lock tongue. If the operation is not smooth, please check again all installation steps.



Congratulations, you have successfully installed the Yeeuu Smart Lock!

FCC Warning Statement Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
