

# OV Valet™ TPD User Manual

## **Introduction**

The OV Valet™ TPD is a Token Payment Device key fob; it supports MST (Mag Stripe Reader) and NFC (Near Field Communications) technologies for payment and is controlled by a companion app (aka OV Loop) over a Bluetooth Low Energy connection. The application will be downloaded from the iOS AppStore or Google Play Store, create an account, connect the OV Valet™ TPD with your phone, load your credit and debit cards, and start making payment with your OV Valet™ TPD in the stores by holding your device close to the payment terminal reader and pressing the device button to make payment.

## **Packaging List**

1. OV Valet™ TPD
2. Lobster Key Ring
3. Micro-USB cable

## **Battery Safety Instructions**

Operation temperature: 0 - 35°C.

## **CAUTION**

- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.
- Battery cannot be subjected to high or low extreme temperatures, low air pressure at high altitude during use, storage or transportation.
- Replacement of a battery with an incorrect type that can result in an explosion or the leakage of flammable liquid or gas.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion.
- Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
- A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

## **Charge your OV Valet™ TPD**

1. Plug the micro-USB male in the OV Valet™ TPD connector
2. Plug the USB male in your computer USB or USB power adaptor
3. OV Valet™ TPD is charged when the LED is green

### **Specifications for Charging**

Capacity: 165mAh

Battery: Li-Polymer

Input: 5V/90mA

Full-charge time: 2h

Cycle life: >100 times

Functioning temperature: 0°C ~ +45°C

Dimensions: 59 x 37 x 4mm

### **Setup OV Valet™ TPD with OV Loop app**

1. Download and install the OV Loop app from the Apple AppStore or Google Play Store
2. Launch the OV Loop app and create a OV Loop account

16. This product has a built-in lithium polymer battery.
17. All accessories and adaptor should only be used with this product.
18. The designer of this product has the final judgment and recession right on all above

items.

**FCC-ID: 2AVSI-OVTPD01**

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
