Ring Information

Model	Token1
-------	--------

FCC ID	2AVVU-TOKEN-01
--------	----------------

Note: Token1 has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits

are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

Token1 has been tested and complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and

- (2) this device must accept any interference received, including interference that may cause undesired operation.

Charger Information

Name	Token Charger
Model	810-00011-A

This device complies with part 18 of the FCC Rules. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This device generates radio frequency energy at 6.78MHz and may cause harmful interference to radio communications operating on the same industrial scientific and medical (ISM) frequency.

If this equipment does cause harmful interference, which can be determined by turning the Token Charger off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the Token Charger.
- Increase the separation between the Token Charger and receiver.
- Turn off Token Charger when not in use.
