

Letter for Model Differences

Date: August 15, 2025

Models: Token Ring 3 (TR3), Token BioStick (TBK)
FCC ID: 2AVVU-TOKEN-TR3TBK

The differences between the models listed here above are the following:

1. USB connector. The TBK takes USB out to a connector and allows operation of the device on USB.
2. Board layout. The products use the same parts, but slightly different layouts due to form factor differences.

Other than the above mentioned differences, these models are electrically identical. They run the same firmware on the MCU and SE.

For further details, refer to the submitted exhibits, such as Operational Description, Block Diagram, Schematics, External Photographs and Internal Photographs.

Sincerely,

A handwritten signature in black ink that reads "Rob Osterwise".

(Signature)

Robert Osterwise
