

# **SOM4019**

IPQ4019 SOM module with dual band dual concurrent Wi-Fi

## **User Manual**

**Note:**

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons.

This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter

This device is intended only for OEM integrators under the following conditions:

- 1) The antenna must be installed such that 20 cm is maintained between the antenna and users. For laptop installations, the antenna must be installed to ensure that the proper spacing is maintained in the event the users places the device in their lap during use (i.e. positioning of antennas must be placed in the upper portion of the LCD panel only to ensure 20 cm will be maintained if the user places the device in their lap for use) and
- 2) The transmitter module may not be co-located with any other transmitter or antenna.

As long as the 2 conditions above are met, further transmitter testing will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed (for example, digital device emissions, PC peripheral requirements, etc.).

**IMPORTANT NOTE:** In the event that these conditions can not be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID can not be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

**End Product Labeling**

This transmitter module is authorized only for use in devices where the antenna may be installed such that 20 cm may be maintained between the antenna and users (for example access points, routers, wireless ASDL modems, certain laptop configurations, and similar equipment). The final end product must be labeled in a visible area with the following: "**Contains TX FCC ID: 2AVW3-SOM4019**".

**RF Exposure Manual Information That Must be Included**

The users manual for end users must include the following information in a prominent location "IMPORTANT NOTE: To comply with FCC RF exposure compliance requirements, the antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter."

**Additional Information That Must be Provided to OEM Integrators**

The end user should NOT be provided any instructions on how to remove or install the device.

## Main Features

- Chipset: industrial-grade IPQ4019 chipset
- Standard: 802.11ABGN/AC
- PCB mounting with normal pin header
- Antenna: 2 x IPEX connectors, 2T2R
- Data rate up to 300 Mbps + 866 Mbps
- Enhanced wireless security: WEP, WPA, WPA2
- High RF power for longer communication range

## Product Overview

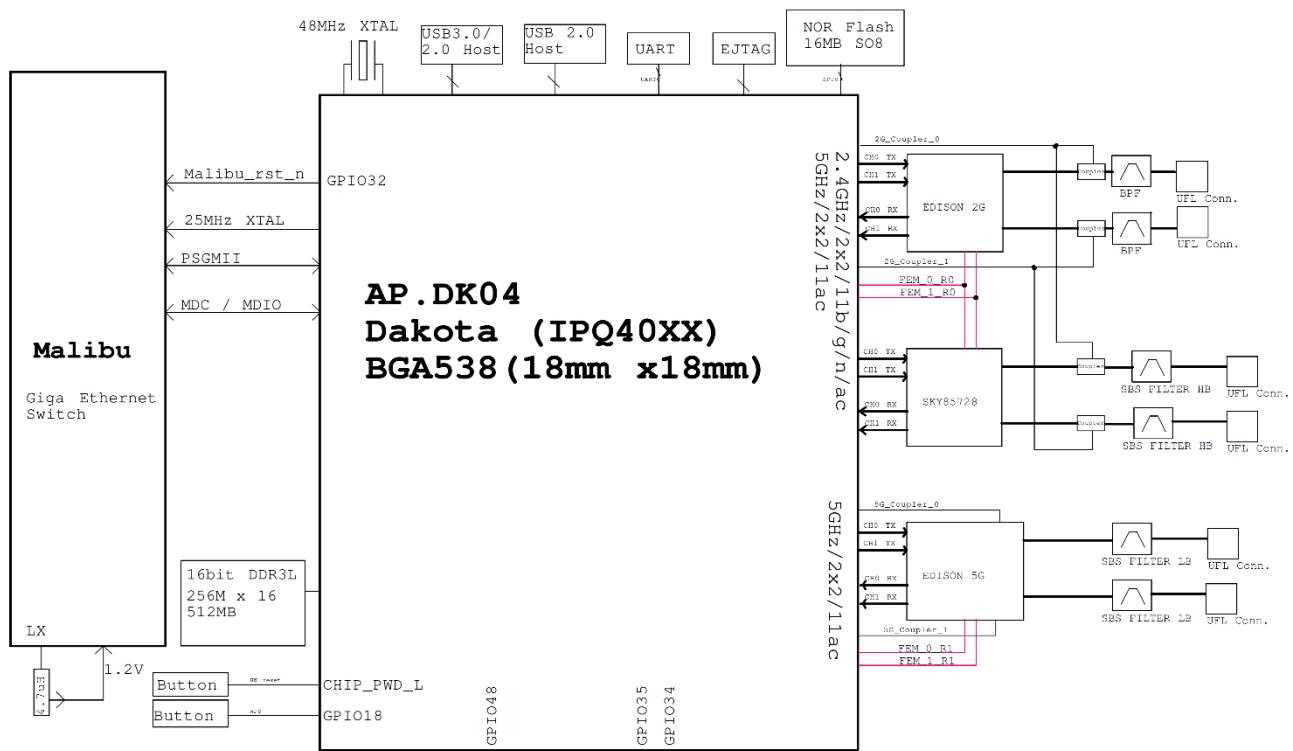

SOM4019 module is based on an IPQ4019/IPQ4029 SoC from Qualcomm, which incorporates a powerful quad-core ARM Cortex A7 processor. It is ideal for resource demanding applications including routers, gateways and access points. SOM4019 comes with a high-power, dual-band concurrent radio supporting 802.11ac Wave2 technology (2x2 MIMO). It also has USB ports and supports other miscellaneous interfaces, which can be configured as general-purpose I/O pins.

## Specification

Item	Description	SOM4019
<b>Processor</b>	ARM Cortex-A7, 716.8MHz, 256KB L2 Cache	IPQ4019
<b>Memory</b>	DRAM	DDR3L 512 MB
	NOR FLASH	32MB
<b>Wi-Fi</b>	IEEE 802.11 b/g/n 2x2 2.4GHz 20/40 MHz	2412MHz - 2482MHz
	IEEE 802.11 an/ac 2x2 5GHz 20/40/80 MHz	5180MHz - 5240MHz 5745MHz - 5825MHz
<b>Peripherals</b>	PCIe 2.0	1
	USB 2.0	1
	USB 3.0	1
	UART	2
	SPI ( Master )	1
	I2C	2
	GPIO	14
	JTAG	1
	Copper 10BASE-T/100BASE-TX/1000BASE-T	2
	Reset	1
	SDIO3.0/eMMC	1
<b>RF Interface</b>	Antenna connector	IPEX
<b>Temperature</b>	Operating temperature Storage temperature	-40~75°C -40 °C ~ 85 °C

P100	GND	GND	Ground

## Mechanical characteristics

Mechanical drawing

## Development with SOM module

SOM4019 module is easy to implement to your design. User only reserve commonly used pin headers as board-to-board connector to have SOM module integrated to your system. You may run the main program in SOM module while regarding the IO interface deployed in the bottom board. When designing with SOM4019, carefully follow the pin definition above for the power & interfaces connections. The following is SOM4019 together with a bottom board for reference.
