

Maximum Target power of Bluetooth

- Each product is programmed with the pre-defined RF parameters
- Each product RF power level is measured to ensure the power level does not exceed the target power level in a fully calibrated setup.
- The end-user has no possibility of altering or changing these settings.

Please find below the **Maximum** Transmit Power for production units:

Band / Mode	Average Power (dBm)			
	BT3.0		BT5.0	
	2DH5	3DH5	1M	2M
Bluetooth	11.0 (peak)	11.5 (peak)	11.5 (peak)	11.5 (peak)
