**Inquiry on 06/20/2021 :**

**Inquiry:**

Dear FCC

We have a product with FCC ID: 2AVZC-A000010007A

This is a single modular but manufacturer have to change its TCXO into crystal due to supplier issue. Product will be fully tested but it seems PCB pattern around the oscillator will be slightly changed. In this case, would it be acceptable to do the C2PC? If you have any concern, please let us know. Detail information including photos, schematics, PCB layout is attached. thank you.

**FCC response on 06/29/2021**

Yes, a C2PC is permissible.
