What's in box:
1.1×wireless keyboard
2.1×USB nano receiver
3.1×User manual

If it fails, repeat the above steps and try it twice or three times.

4. Confirm that the keyboard is within the effective working distance, the distance range is 10 meters.
5. Confirm that there are no interference sources that interfere with wireless signals. Interference sources include metal surfaces and other wireless signals, etc.
6. Try to restart the keyboard or the device, and re-establish the connection, etc.

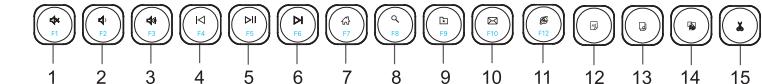

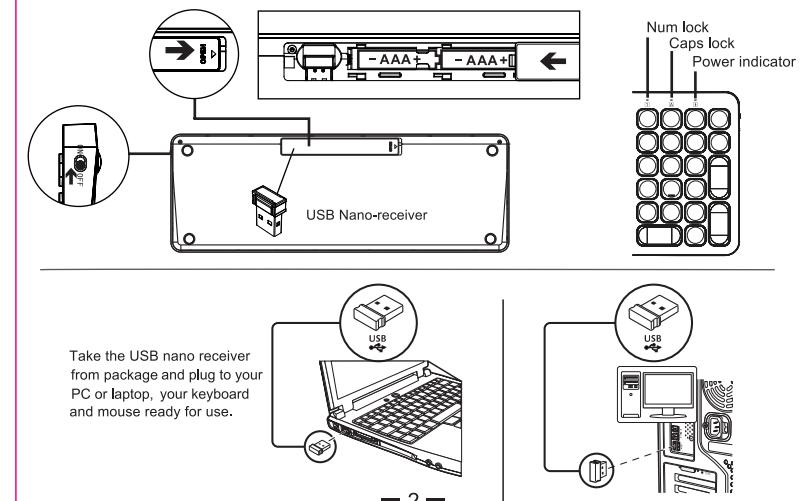

Note:

1. The keyboard will get sleep without any operation in a time, press any key to wake them.
2. The keyboard support Windows and macOS, but few keys may not work in some system versions.

Precautions:

1. Avoid scratches by sharp instruments.
2. Avoid squeezing, impact, bending.
3. Avoid exposure to the sun, rain, and fire.
4. Keep away from similar microwave radiation sources.
5. Keep away from oil, liquid, chemical or other organic solvents.

Statement:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
