## Product specification

Input power: two AAA batteries (not included)  
Transmission range: within 10M  
Power consumption: Operating mode 15mA/H  
Standby mode 0.3 mA/H  
Sleep mode 0.02mA/H  
Size: Mouse 105x55x25 mm  
Weight: Mouse 62g (battery not included)  
Battery duration: It can last for one month with 8 hours a day.  
(Usage time varies with the user's environment)  
Longest life: 1000000 times  
Resolution: 800-1200-1600DPI  
Interface: USB2.0 (Plug and play)  
OS Windows XP/VISTA/7/8/10/Mac 10.6 over

## Precautions

- Please don't disturb by another wireless mouse.
- If there are other objects between the mouse and the nano receiver, it will lead to bad reception.
- If you use mouse on a monochrome desk, the battery can be used longer.
- Using a wireless mouse on a table with uneven surface, glass or 3D mouse pad and so on will make the operation not smooth.
- When moving or not using for a long time, in order to make the battery last longer, please separate the battery and the mouse.
- If the mouse does not work, please change the battery then use it again.
- Light sensor on a delicate surface without light reflection can be able to perform optimally.
- Wireless mouse does not require a separate driver installation and utility setting.
- Do not use in hot or humid places or in dusty places.
- Please don't let the wireless mouse fall or be hit hard.
- Please don't separate the wireless mouse and the nano receiver.

RF 2.4GHz Cordless Optical Mouse

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) this device may not cause harmful interference, and  
(2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and

- 7 -

receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
