

The product description

AB5365A is the main control bluetooth to complete data interaction and control. After powering on, the main control IC communicates with the mobile phone to obtain and send data.

1. Bluetooth IC: AB5365A 32-bit processor, 26 MHz Crycstal oscillator

2. Headphones

2.4g wireless communication function

4. Debug: PB3 displays debugging information

Bluetooth description

Frequency Range: 2402MHz~2480MHz

Modulation: BDR, EDR

Antenna: Printed antenna with gain of 1.3dBi
