Rationale for request for confidentiality

TechMah Medical, LLC has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the permanently confidential sections of this application to competitors would give them significant competitive advantages in developing similar products and will also disclose unpublished technology developed by TechMah Medical, LLC. Disclosure of the short-term confidential portion of this application during the period of distribution would reveal key aspects of proprietary technology to competitors and diminish the value of our investment in research and development.
